Nexpreneur OS
User Manual

The complete guide to running a coworking space: members, bookings, billing, community and more. With worked examples and sample data wherever it helps.

For owners, managers, front desk, finance, community teams and members

Version 1.0 · October 2026

CHAPTER 1

Welcome to Nexpreneur OS

Nexpreneur OS is one web application for running a whole coworking business: who your members are, what spaces they book, what they owe and have paid, who is visiting today, which leads are about to sign, and how the business is performing. It works on a laptop, tablet or phone, with nothing to install.

1.1 What you can do with it

Area	What it does
Members & Companies	Keep a record of every member and company, with plan, location, contact details, GSTIN and what they owe.
Memberships & Coupons	Create plans (Flexi, Fixed Desk, Private Office, Virtual Office or your own), start them for members, pause or cancel them, and offer discount coupons.
Bookings	Book hot desks, dedicated desks, meeting rooms, private offices, phone booths and event spaces, with live availability, a calendar and a floor map. Double-booking is not possible.
Invoices & Payments	GST-ready tax invoices (CGST + SGST or IGST), online payment through Razorpay, cash/UPI/bank/card recorded at the desk, part payments, refunds, and e-mailed invoices.
Automatic renewals & reminders	Renewal invoices are issued for you before each renewal date, and members get polite payment reminders.
Visitors	Members invite guests and get a QR code to share; reception checks guests in and out.
CRM	A sales pipeline for enquiries: new lead through tour, proposal and negotiation to won or lost.
Events & Community	Publish events with photos and optional paid tickets; a member feed with posts, jobs, questions, comments and likes; a member directory.
Services	A small marketplace (printing, parking, coffee, mail handling…) that members order and are invoiced for.
Analytics & Dashboard	Revenue, MRR/ARR, occupancy, churn, conversion, location comparison, and CSV export.
AI Assistant	Ask in plain language: “Show available desks tomorrow”, “Book Meeting Room A at 3 PM”. It never books anything until you press Confirm.
Notifications, Support, Settings	An in-app notification centre, a help-request inbox, and team & role management with a full audit log.

1.2 Who this manual is for

The application shows each person only what their job needs. There are eight roles, and this manual marks which chapters matter to each:

Role	Typical person	Read first
Owner / Super Admin	Founder or business owner. Sees and changes everything, including team and settings.	Chapters 2, 5–9, 21, 23, 25

Role	Typical person	Read first
Location Manager	Runs one or more locations day to day. Everything except Settings.	Chapters 5–19, 21
Reception	Front desk: members, bookings, visitors, support.	Chapters 7, 10, 14, 19
Finance	Invoices, payments, refunds, memberships, companies, analytics.	Chapters 8, 9, 11, 12, 13, 21
Community Manager	Events, community feed, announcements, member list (view only).	Chapters 16, 17, 20
Staff	Operations: bookings, calendar, resources, visitors.	Chapters 10, 14
Member	A person who rents space. Has a simple portal.	Chapter 24

Chapter 4 has the complete permission table.

1.3 How to read this manual

- `Sidebar › Members › Add member` shows the path to a screen or button.
- An orange-bordered **Sample data** box is a worked example using the fictional business below. Follow along with your own details.
- **Tip** boxes (green) save time. **Note** boxes (blue) explain how something works. **Careful** boxes (orange) prevent mistakes.
- All amounts are in Indian rupees (₹). Times are India Standard Time (IST).

1.4 The sample business used in examples

Every example uses one imaginary company so the numbers connect from chapter to chapter.

SAMPLE DATA

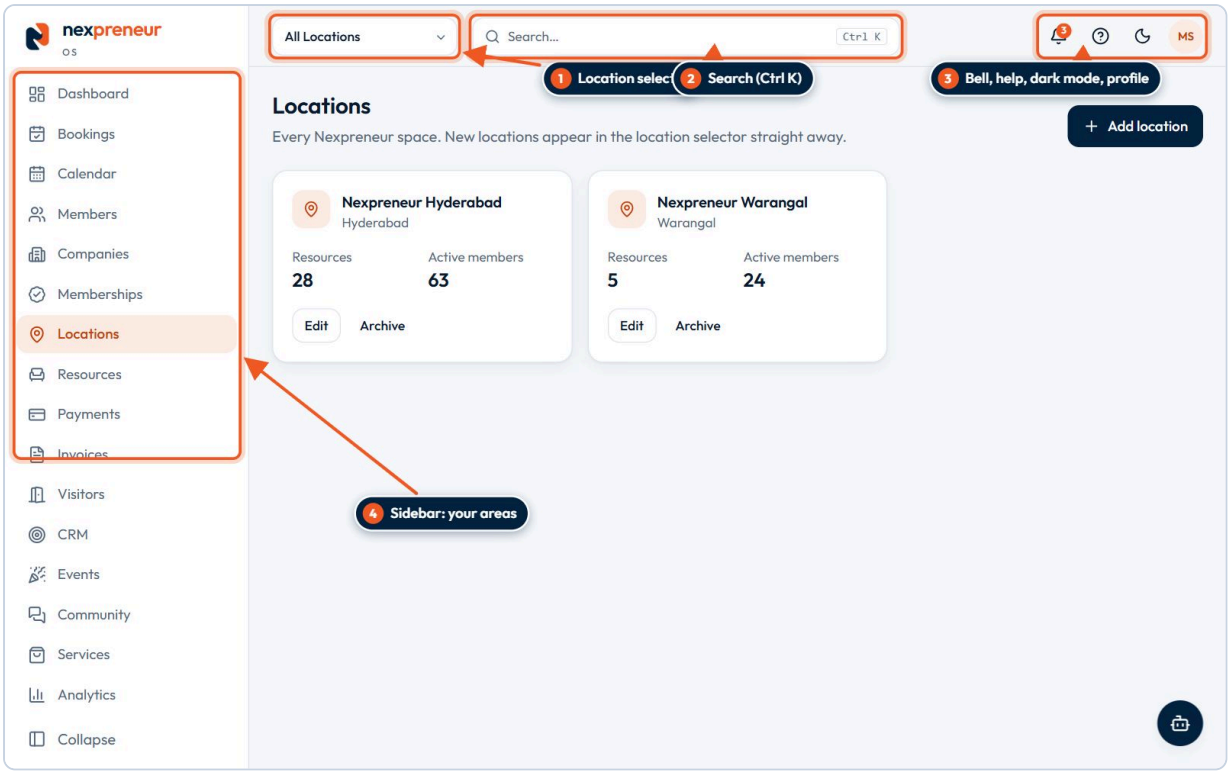

Nexpreneur has two locations: **Nexpreneur Hyderabad** (the main space) and **Nexpreneur Warangal**. Its team:

Person	Role	Does
Mohammed Sajeed	Owner	Sets prices, manages the team
Divya Nair	Reception (Hyderabad)	Adds members, checks in visitors
Ravi Gupta	Finance	Invoices, payments, refunds
Sneha Iyer	Community Manager	Events and the community feed

Its members include **Aarav Reddy** (Zenith Labs, Flexi plan), **Ananya Rao** (BluePeak Studio, Fixed Desk), **Imran Khan** (Orbit Foods, Private Office), **Kavya Verma** (CodeNest, Flexi, Warangal) and **Harsha Nair** (GreenLoop, Virtual Office). A full data book is in Appendix A.

1.5 The screen at a glance

Every page has the same frame, so once you know it you know the whole product.

Every page has the same frame

1 Location selector 2 Search (press Ctrl K) 3 Bell, help, dark mode and your profile 4 Sidebar: one entry for each area you may use

Part of the screen	What it does
Sidebar	Lists only the sections your role may use. The **Collapse** button at the bottom shrinks it to icons. On a phone it becomes a bottom bar.
Location selector	Chooses which location you are looking at. Owners also get **All Locations**.
Search (`Ctrl` + `K`)	Jump to any page, or find a member, invoice, resource, event, lead or company.
Bell	Notifications with an unread count.
Help (?)	Opens search so you can jump straight to a page.
Moon / sun	Switches between light and dark mode (remembered on this device).
Round avatar	Your name and role, **Profile**, and **Sign out**.
Round button, bottom right	Opens the AI Assistant (if your role has it).

CHAPTER 2

Getting started

This chapter takes you from an empty system to a working coworking space: creating the owner account, signing in, and the first-day setup that everything else depends on.

2.1 First-day checklist (owners)

Do these in order. Each one is explained later in the manual.

#	Task	Where	Chapter
1	Create the first account. It becomes the **Owner**.	`/register`	2.2
2	Check your three starter locations; add or rename as needed.	Sidebar › Locations	6
3	Add your desks, rooms and offices with their prices.	Sidebar › Resources	6
4	Review the four starter plans; edit prices; add your own.	Sidebar › Memberships	8
5	Add your team (reception, finance, community, staff).	Sidebar › Settings › Team & roles	23
6	Add your existing members and start their plans.	Sidebar › Members	7
7	Set your seller name and GSTIN so invoices print them.	Server settings (administrator)	25
8	Switch on e-mail, Razorpay, the daily job, and optionally Google sign-in and the AI Assistant.	Server settings (administrator)	25

CAREFUL

The **first** person to register becomes the Owner and creates the organisation. Register your own account immediately after the system goes live, before sharing the web address with anyone.

2.2 Creating the Owner account

Open › os.nexpreneur.com/register

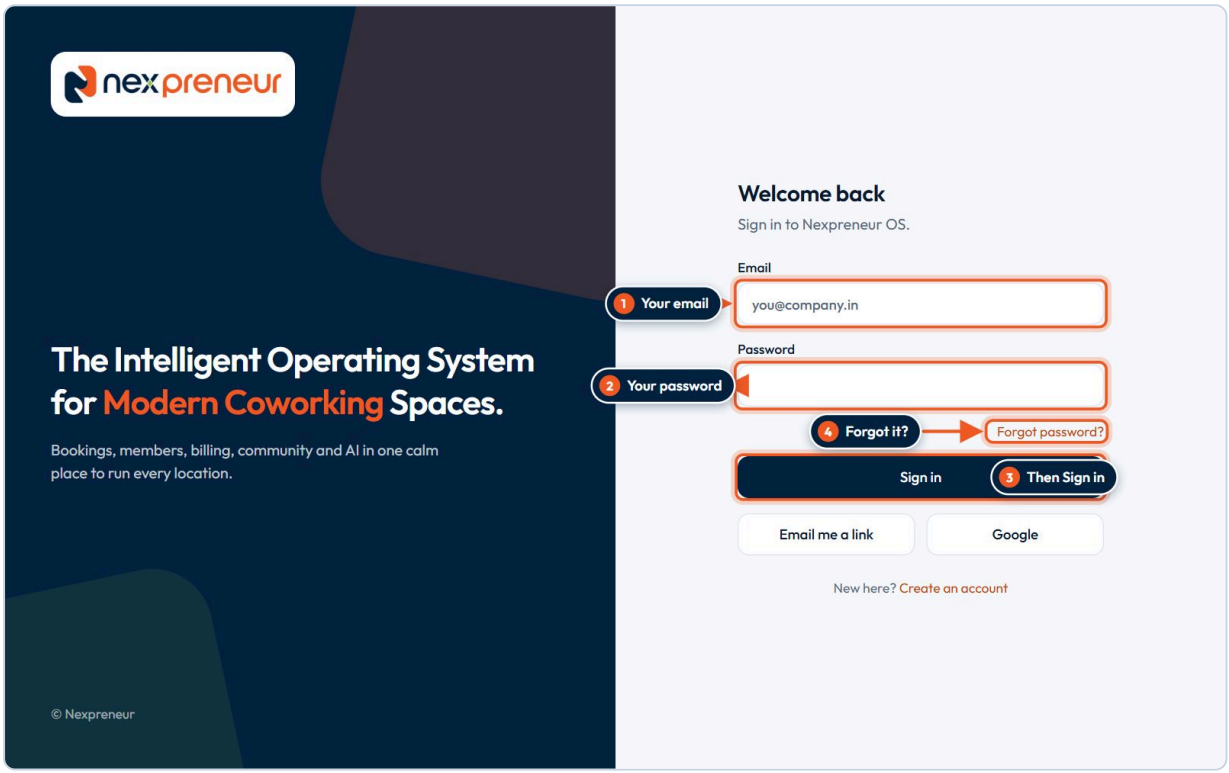

1. Type your **full name**, **email** and a **password** (8 to 72 characters).
2. Press **Create account**.
3. You are signed in as **Owner**. In the background the system created your organisation **Nexpreneur**, a set of starter locations (which you can rename or archive in Locations) and four plans (Flexi ₹3,999, Fixed Desk ₹4,999, Private Office ₹19,999, Virtual Office ₹999 per month).

SAMPLE DATA
Name: **Mohammed Sajeed** Email: **owner@nexpreneur.example** Password: a long phrase you will remember, such as *Coworking-Hyd-2026!*

NOTE
Anyone who registers after the Owner joins as a **Member** with no extra rights. Owners promote people to staff roles in Settings (chapter 23). You can also add members yourself (chapter 7), which is how most coworking spaces work.

2.3 Signing in

Open › os.nexpreneur.com/login

Signing in
1 Your email 2 Your password 3 Press Sign in 4 Forgot password? (see 2.4)

Option A: email and password

Type your email and password and press **Sign in**. After 8 wrong attempts in 10 minutes the system pauses sign-in for a few minutes to stop password guessing.

Option B: email me a link

1. On the sign-in page press **Email me a link** and enter your email.
2. Open the email and press the link. A page opens with a **Sign in** button.
3. Press it. You are in. The link works once and expires after 15 minutes.

WHY THE EXTRA BUTTON?
Some email programs open links automatically to scan them. The extra click makes sure a scanner cannot use up your one-time link before you do.

Option C: Google

Press **Google**, pick your Google account, and you are signed in. If an account with the same verified email exists, you enter that account. Otherwise a new Member account is created.

> **NOTE**
> The **Email link** and **Google** buttons are greyed out until an administrator sets up email and Google (chapter 25). Password sign-in always works.

After signing in you land on the page that suits your role:

Role	Lands on
Owner, Super Admin, Location Manager, Member	Dashboard (members see their Home)
Reception	Visitors
Finance	Invoices
Community Manager	Community
Staff	Bookings

2.4 Forgotten password

1. On the sign-in page press **Forgot password?** and enter your email.
2. You always see “If an account exists for that email, we’ve sent a reset link”. This is deliberate: it stops strangers checking who has an account.
3. Open the email, press the link, choose a new password twice, and press **Update password**.
4. Sign in with the new password. All your other devices are signed out for safety.

The link works once and lasts one hour. If email is not set up yet, the page says so; ask an owner or reception to set a temporary password for you (chapter 7.6).

2.5 Your profile

Avatar › Profile or Sidebar › Profile

Everyone can keep their own details up to date:

Field	Notes
Full name	Shown on bookings, invoices and the community.
Phone, Job title, Company	Job title and company appear in the member directory.
Emergency contact name and phone	Visible to managers and reception only.
Change password	Type the current password, then the new one. Your other devices are signed out; this one stays signed in.

2.6 Demo mode

If the system has no database connected yet, the sign-in page shows a **Sign in as** menu and any email and password work. This is demo mode: it shows sample screens so you can look around, but nothing is saved. As soon as a real database is connected, demo sessions stop working and the menu disappears.

2.7 Staying signed in and signing out

- A session lasts **8 hours**, then you sign in again.
- Your **role is checked against the database on every page**. If an owner changes your role or deactivates your account, it takes effect immediately.
- To leave: avatar › **Sign out**. On a shared computer always sign out.

CHAPTER 3

Finding your way around

A few tools appear on every page. Learning them first makes everything else quicker.

3.1 Sidebar and mobile navigation

The sidebar lists the sections your role may use. Items are in this order: Dashboard, Bookings, Calendar, Members, Companies, Memberships, Locations, Resources, Payments, Invoices, Visitors, CRM, Events, Community, Services, Analytics, AI Assistant, Notifications, Support, Settings, Profile. You only see the ones allowed for you.

- **Collapse** (bottom of the sidebar) shrinks it to icons to give wide tables more room.
- On a **phone** the sidebar is replaced by a bottom bar with five shortcuts. Members get *Home, Bookings, Membership, Payments, Profile*; staff get their first five sections. Everything else is reachable through **Search**.

3.2 The location selector

The box at the top left decides which location you are looking at. It affects Bookings, Resources, Members, Services orders, Analytics and the Dashboard.

If you choose	You see
All Locations (owners only)	Everything together.
Nexpreneur Hyderabad	Only resources, bookings, memberships and invoices of that location.

SAMPLE DATA

Members list with **All Locations**: 120 members. Switch to **Nexpreneur Warangal**: the list shows members whose home location is Warangal, plus members who have no home location set (they appear everywhere until you assign one).

Your choice is remembered on this device. Locations you add (chapter 6) appear in the selector immediately.

3.3 Search

Press `Ctrl` + `K` (`⌘` + `K` on a Mac) or press the search box. Type at least two letters.

- **Pages** are matched first (type “inv” to jump to Invoices).
- **Records** follow: members, resources, invoices (by number), events, leads, companies. You only see record types your role may open.
- Press `Enter` to open the first result, or click any result. `Esc` closes.

SAMPLE DATA

Type **zen** → *Aarav Reddy · Member* (company Zenith Labs) | type **INV-2026** → every invoice from 2026 | type **room** → *Meeting Room A*, *Meeting Room B*.

3.4 The notification bell

The bell shows how many notifications you have not read and updates about once a minute. Press it to open the Notification Centre (chapter 20).

3.5 Dark mode

The moon/sun button switches between light and dark mode. Pick whichever is easier on your eyes; invoices always print in black on white.

3.6 The AI button

The round button at the bottom right opens the AI Assistant (chapter 22). It is hidden on the Assistant page itself.

3.7 Keyboard shortcuts and small habits

Keys	Action
`Ctrl` + `K` / `⌘` + `K`	Open or close search
`Esc`	Close search or a side panel
`Enter` in search	Open the first result
`Ctrl` + `P` on an invoice	Print or save as PDF (same as the **Print / Save as PDF** button)

> **TIP**
> Every table has a search box above it and page arrows below. Searching a table filters instantly without leaving the page.

CHAPTER 4

Roles and permissions

Roles keep people focused and protect sensitive data. Permissions are enforced on the server: even if someone types a web address by hand, the system checks their role first.

4.1 Who can open which section

✓ = can open **own** = sees only their own records – = hidden

Section	Owner / Super Admin	Location Mgr	Reception	Finance	Community	Staff	Member
Dashboard	✓	✓	✓	✓	✓	✓	✓
Bookings	✓	✓	✓	–	–	✓	**own**
Calendar	✓	✓	✓	–	–	✓	–
Members	✓	✓	✓	–	**view**	–	–
Companies	✓	✓	–	✓	–	–	–
Memberships	✓	✓	–	✓	–	–	**own**
Locations	✓	✓	–	–	–	–	–
Resources	✓	✓	**view**	–	–	**view**	–
Payments	✓	✓	–	✓	–	–	**own**
Invoices	✓	✓	–	✓	**own**	–	**own**
Visitors	✓	✓	✓	–	–	✓	**own**
CRM	✓	✓	–	–	–	–	–
Events	✓	✓	–	–	✓	–	**join**
Community	✓	✓	–	–	✓	–	✓
Services	✓	✓	–	–	–	–	**order**
Analytics	✓	✓	–	✓	–	–	–
AI Assistant	✓	✓	–	–	–	–	✓
Support	✓	✓	✓	–	–	–	✓
Notifications, Profile	✓	✓	✓	✓	✓	✓	✓
Settings	✓	–	–	–	–	–	–

4.2 Who can change things

Being able to open a page is not the same as being able to change it. These are the finer rules:

Action	Allowed roles
Add, edit, deactivate members; send password links; set temporary passwords	Owner, Super Admin, Location Manager, Reception

Action	Allowed roles
Start, pause, cancel a plan; create invoices; record payments; send invoices by email	Owner, Super Admin, Location Manager, Finance
Refund a payment	Owner, Super Admin, Location Manager, Finance
Void an unpaid invoice	Owner, Super Admin, Location Manager, Finance
Create and edit plans, coupons, services; archive plans	Owner, Super Admin, Location Manager
Add and edit resources and their prices	Owner, Super Admin, Location Manager
Add, rename, archive locations	Owner, Super Admin
Companies: create, edit, link members	Owner, Super Admin, Location Manager, Finance
Create and edit events; see attendees	Owner, Super Admin, Location Manager, Community Manager
Post announcements; delete any community post; send notification announcements	Owner, Super Admin, Location Manager, Community Manager
Check visitors in and out	Owner, Super Admin, Location Manager, Reception, Staff
See all support requests and close them	Owner, Super Admin, Location Manager, Reception (members see and close their own)
Team & roles, audit log	Owner, Super Admin only
Grant the Super Admin role	Super Admin only

MONEY IS PROTECTED

Roles without finance rights (reception, staff, community) never receive revenue, MRR, outstanding amounts, payments or renewal lists, even on the Dashboard. The figures are not simply hidden on screen; they are not sent to the browser at all.

CHAPTER 5

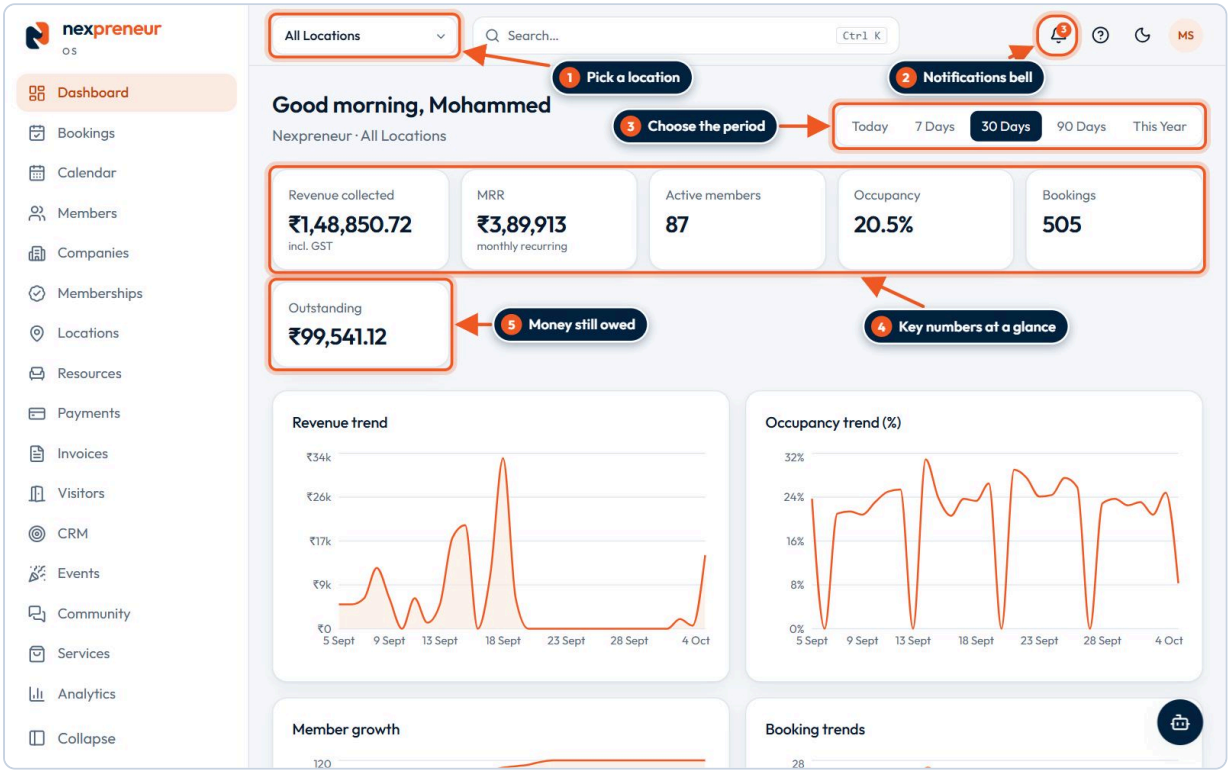

The Dashboard and member Home

The Dashboard is your morning briefing: how busy the space is, how money is moving, and what needs attention today. Members get a simpler, personal Home instead.

5.1 The admin Dashboard

Sidebar › Dashboard

Pick a period with the tabs at the top right: **Today**, **7 Days**, **30 Days**, **90 Days** or **This Year**. Everything on the page, and the location selector, follows your choice.

The owner Dashboard (30 Days, All Locations)

1 Location selector 2 Notification bell 3 Period tabs 4 Key numbers 5 Money still owed

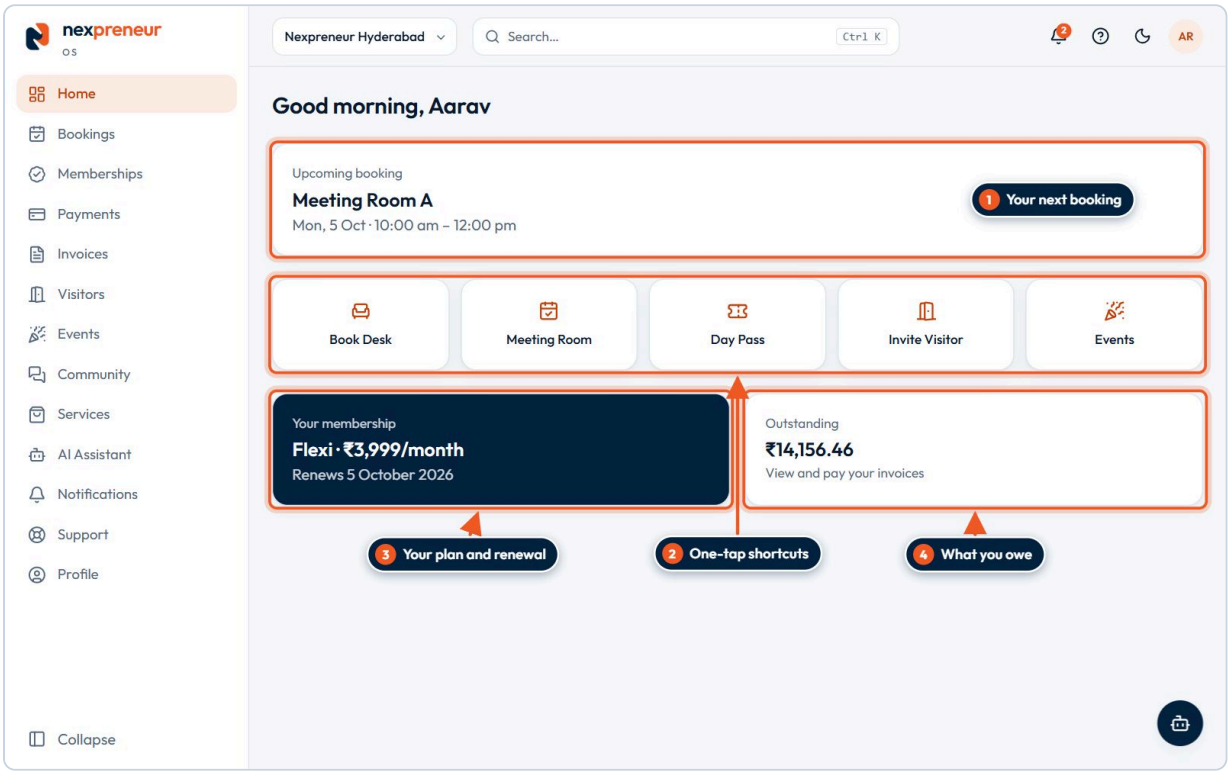

Card	Meaning
Revenue collected	Payments received in the period, including GST. (Finance roles only.)
MRR	Monthly recurring revenue: what active plans bring in per month, before GST. A yearly plan counts as one twelfth. (Finance roles only.)
Active members	People with an active plan.
Occupancy	Booked hours ÷ open hours (06:00–22:00) across all your resources.
Bookings	Confirmed and completed bookings that start in the period.
Outstanding	Unpaid invoice balances. (Finance roles only.)

Below the cards are four charts (Revenue trend, Occupancy trend, Member growth, Booking trends) and up to six lists:

List	Shows
Today's activity	The latest actions in the system, in plain words: "Divya Nair checked a visitor in".
Upcoming bookings	The next five confirmed bookings.
Recent payments	The latest five payments received. (Finance roles.)
Upcoming events	Next published events.
New leads	Latest CRM leads with expected value. (Roles with CRM.)
Membership renewals	The next renewal dates. (Finance roles.)

> **NOTE**
> Chart buckets change with the period: hourly for Today, daily for 7 and 30 days, weekly for 90 days, monthly for This Year.

5.2 Member Home

Member Home as a member sees it
1 Next booking 2 One-tap shortcuts 3 Your plan and renewal date 4 What you owe

Members see a friendly page instead:

- **Greeting** that follows the time of day (Good morning / afternoon / evening).
- **Upcoming booking**: the next confirmed booking, or a link to book a space.
- **Quick actions**: Book Desk, Meeting Room, Day Pass, Invite Visitor, Events.
- **Membership card**: plan, price and renewal date.
- **Outstanding**: how much they owe, with a link to pay.

SAMPLE DATA

Good morning, Aarav — Upcoming booking: **Meeting Room A**, Mon 5 Oct, 10:00 AM – 12:00 PM. Membership: **Flexi · ₹3,999/month**, renews 5 November 2026. Outstanding: **₹0** (You're all paid up).

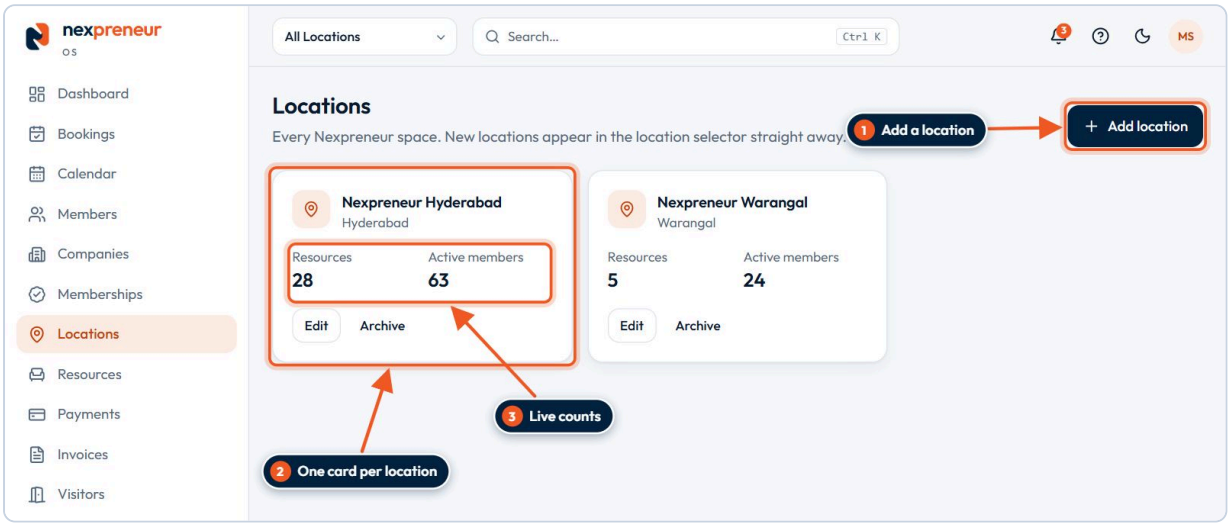

CHAPTER 6

Setting up your space: Locations and Resources

Before anyone can book, the system needs to know what you have: your locations, and every desk, room and office inside them with its price.

6.1 Locations

Sidebar › Locations

Locations: one card per place
1 Add a location 2 Live resource and member counts 3 One card per location

Each location is a card showing the number of resources and active members. Owners can:

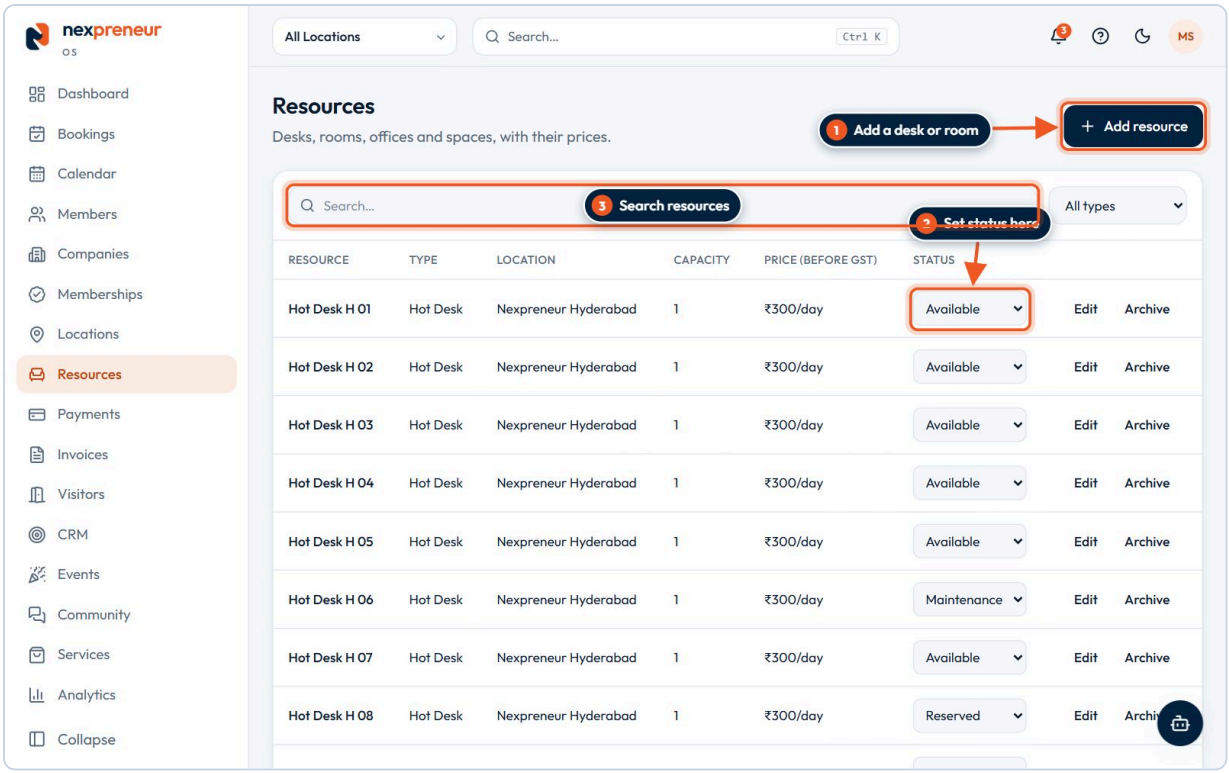

- **Add location**: enter a name (for example “Nexpreneur Karimnagar”) and a city. It appears in the top selector at once.
- **Edit**: rename it or change the city.
- **Archive**: hides a location you no longer use. The system refuses while the location still has resources or active members, so nothing is left pointing at a closed space. You always need at least one location.

SAMPLE DATA

Location	City	Resources	Active members
Nexpreneur Hyderabad	Hyderabad	28	63
Nexpreneur Warangal	Warangal	5	24

6.2 Resources: what you rent out

Sidebar › Resources

Resources with their prices and status

1 Add a desk or room 2 Search 3 Change status (Available, Reserved, Maintenance)

Resources are the things people book. Each has a **type**, a **location**, a **capacity**, a **price** and a **status**.

Type	Charged	Typical example
Hot Desk	per day	Hot Desk H01 · ₹300/day
Dedicated Desk	per day	Dedicated Desk D01 · ₹400/day
Private Office	per day	Private Office P1 (6 people) · ₹1,500/day
Meeting Room	per hour	Meeting Room A (6 people) · ₹800/hour
Phone Booth	per hour	Phone Booth 1 · ₹150/hour
Event Space	per hour	Event Space (60 people) · ₹6,000/hour

All prices are **before 18% GST**; GST is added when someone books.

Adding resources (owners and managers)

1. Press **Add resource**.
2. Type a **name**, choose the **location** and **type**, set **capacity** and the **price** (per hour or per day depending on the type) and the **status**.
3. To create many at once, set **How many to add**. The system numbers them for you.
4. Press **Add**.

SAMPLE DATA

Name: **Hot Desk H** · Location: Nexpreneur Hyderabad · Type: Hot Desk · Capacity: 1 · Price per day: **₹300** · How many: **16**

Result: sixteen desks named *Hot Desk H 01* to *Hot Desk H 16*, each ₹300 per day.

Status and archiving

Status	Effect
Available	Can be booked.
Reserved	Held (for example for a long-term tenant). Not bookable.
Maintenance	Temporarily out of use. Not bookable. Use this instead of archiving when a room is only being repaired.
Unavailable	Not bookable.

Change a status straight from the table with the drop-down. **Archive** removes a resource from booking and the floor map. It is blocked if the resource has upcoming bookings (cancel those first).

> **CHANGING A PRICE**
> Press **Edit**, change the price, **Save changes**. New bookings use the new price; bookings already made keep the price they were made at.

> **TIP: SAMPLE RESOURCES**
> If the Floor map tab in Bookings is empty, owners will see an **Add demo resources** button that creates about 30 desks and rooms across your locations to explore with. You can archive them later.

CHAPTER 7

Members

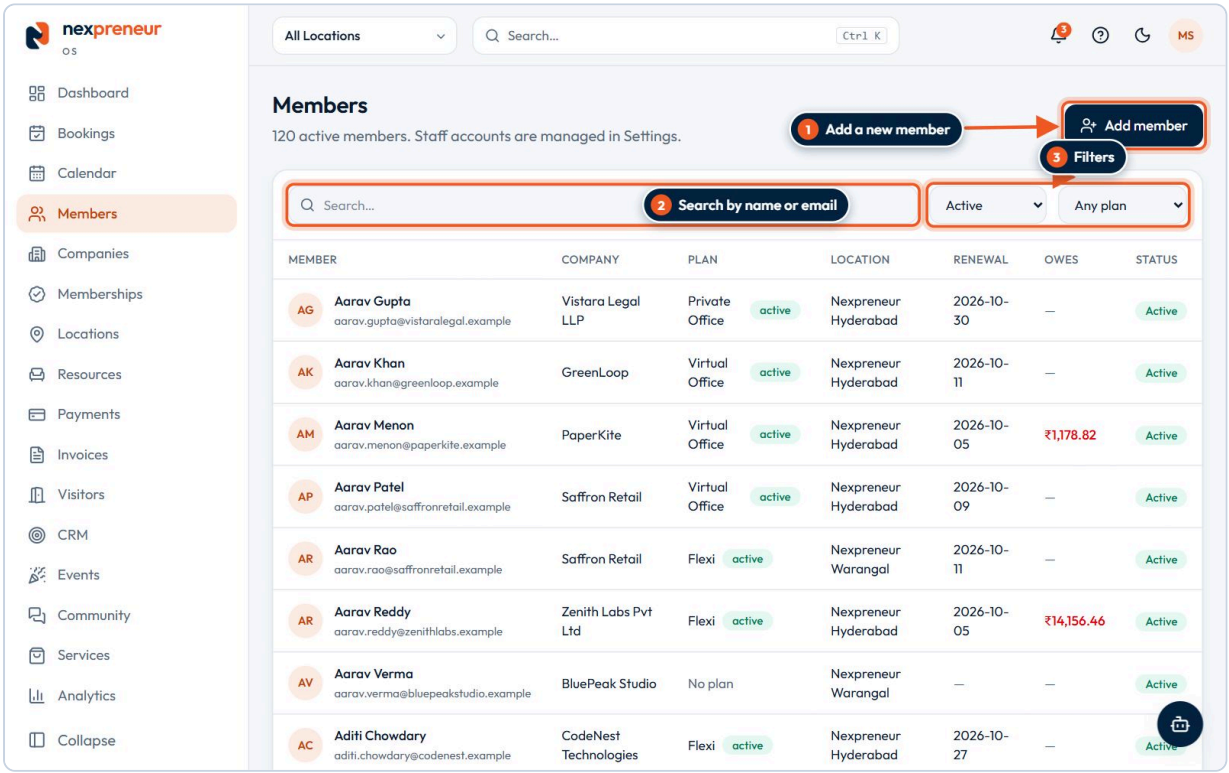

The Members section is your customer list. Reception and managers use it to onboard people, keep details current, start plans and help with passwords.

7.1 The member list

Sidebar › Members

Column	Meaning
Member	Name and email. Click to open the member's page.
Company	Linked company (chapter 9) or the company name typed in.
Plan	Current plan with a coloured status: active paused cancelled expired. "No plan" if none.
Location	Home location.
Renewal	Next renewal date of an active plan.
Owes	Unpaid invoice balance (shown to finance roles and managers).
Status	Active or Deactivated account.

Use the search box (name, email, company, plan, phone) and the two filters: **Active / Deactivated / All**, and **Any plan / Plan active / paused / cancelled / No plan**. The location selector narrows the list too.

The member list

1 Add a new member 2 Search by name, email, company or plan 3 Filters for status and plan

7.2 Adding a member

Members › Add member

Owners, managers and reception can add members. The form has three parts.

Part 1: who they are

Field	Notes
Full name, Email	Required. The email must not already have an account.
Phone, Job title	Optional. Job title shows in the member directory.
Company (linked)	Pick an existing company from chapter 9. Invoices can then be billed to it.
Company name	Free text, if the company is not in the list.
Home location	The location they mainly use. Defaults to the one chosen in the top selector.

Part 2: how will they sign in?

- **Email them a link to choose their own password** (best): the member receives a welcome email with a **Set my password** button. The link works once and lasts 7 days. Available once email is set up.
- **Set a temporary password myself**: you type one (at least 8 characters) and tell the member privately. They can change it later on their Profile.

Part 3: start a plan now (optional, finance roles and managers)

Choose a **plan**, **start date** and optional **coupon**. The system starts the plan, calculates the renewal date, issues the first GST invoice and emails it.

SAMPLE DATA

Name: **Kavya Verma** · Email: kavya@codenest.example · Phone: +91 98765 43210 · Job title: Developer · Company: CodeNest · Home location: **Nexpreneur Warangal**

Sign-in: **Email them a link** · Plan: **Flexi** · **₹3,999** · Start: 5 Oct 2026 · Coupon: **WELCOME10**

Result: a green message “Kavya Verma was added and an invitation email was sent”, a link to invoice **INV-2026-0233**: ₹3,999.00 − 10% = ₹3,599.10 + GST ₹647.84 = **₹4,246.94**, and a renewal date of **5 November 2026**.

> IF SOMETHING IS MISSING
> If the invitation email cannot be sent, the member is still created; the message tells you, and you can press **Send password link** on their page later. If the plan cannot be started (for example the coupon is invalid), the member is still created and the message explains why.

7.3 A member’s page

Click a name to open the member’s page. A header card shows contact details, job and company, home location, and badges for status and plan. Seven tabs follow:

Tab	What it holds
Overview	Joined date, last sign-in, amount owed, and the action buttons (7.4 to 7.6).

Tab	What it holds
Membership	Start a plan; history of every plan with Pause, Resume and Cancel.
Bookings	The 15 latest bookings with space, time, price and status.
Invoices	The 15 latest invoices with number, date, total, status. (Finance roles.)
Activity	The recorded actions about this person (added, updated, password set…).
Access	Door and desk access control. *Coming soon.*
Documents	Agreements and ID documents. *Coming soon.*

7.4 Editing details and the member's plan

- **Edit details** (Overview tab): change name, email, phone, job title, company, home location. Changing the email moves their sign-in to the new address; it is recorded in Activity.
- **Start a plan** (Membership tab): choose plan and start date, optional coupon. Same behaviour as 7.2.
- **Pause**: stops renewals and invoices but keeps the history. **Resume** turns it back on.
- **Cancel**: ends the plan permanently (a confirmation appears). To start again, start a new plan.

7.5 Deactivating and reactivating

On the Overview tab, **Deactivate** blocks sign-in immediately and signs the person out on the very next page they open. Nothing is deleted: invoices, bookings and history remain. **Reactivate** restores access. Use this when someone leaves.

7.6 Passwords for members

Situation	What to do
New member, email set up	Choose "Email them a link" when adding.
Member lost the invitation	Overview › **Send password link**. A new 7-day link is emailed.
Member forgot their password	They can use **Forgot password?** themselves, or you can use **Send password link**.
Email is not set up, or they cannot receive email	Overview › **Set a temporary password** (8 to 72 characters) › **Set password**. They are signed out everywhere and use the new password.

> **PRIVACY**
> You can set or reset a password but you can never see a member's existing password. Passwords are stored scrambled and cannot be read by anyone, including administrators.

7.7 Members versus staff

The Members section lists people with the **Member** role. Your own team (reception, finance, community, staff, managers) is created and managed in **Settings › Team & roles** (chapter 23). Anyone who signs up through the public page also starts as a member.

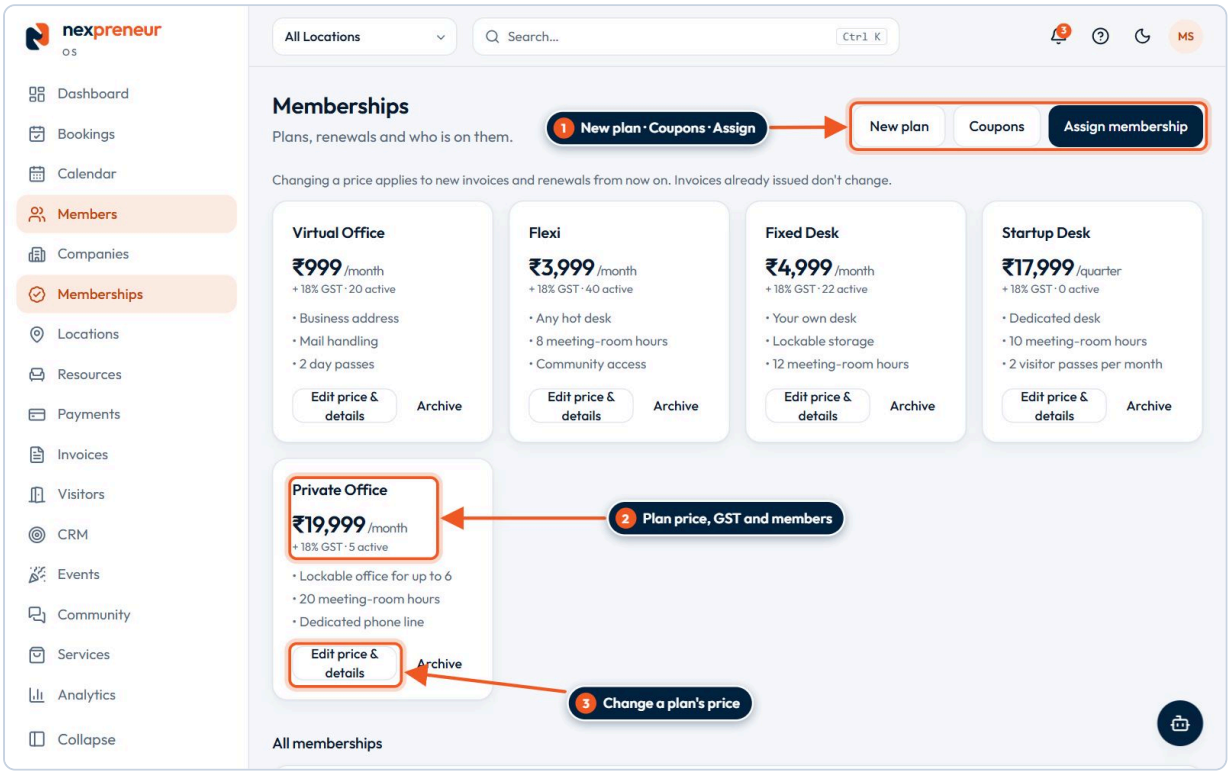

CHAPTER 8

Memberships, plans and coupons

A **plan** is what you sell (for example Flexi at ₹3,999 a month). A **membership** is one member being on one plan. This chapter covers both, plus discount coupons.

8.1 Plans

Sidebar › Memberships

Plans and prices

1 New plan, Coupons and Assign membership 2 Price, GST and number of active members 3 Edit price and details

Plans appear as cards at the top of the page showing the name, price, billing cycle, benefits and (for managers) how many members are active on it. Prices are **before 18% GST**.

SAMPLE DATA: THE FOUR STARTER PLANS

Plan	Price / month	GST 18%	Invoice total	Benefits (example)
Flexi	₹3,999	₹719.82	₹4,718.82	Any hot desk, 8 meeting-room hours
Fixed Desk	₹4,999	₹899.82	₹5,898.82	Your own desk, lockable storage
Private Office	₹19,999	₹3,599.82	₹23,598.82	Lockable office for up to 6, 20 meeting-room hours
Virtual Office	₹999	₹179.82	₹1,178.82	Business address, mail handling

8.2 Creating and changing plans (owners and managers)

New plan

1. Press **New plan**.
2. Enter the **plan name**, **price** in rupees (before GST), choose a **billing cycle** (Monthly, Quarterly or Yearly) and list **benefits**, one per line.
3. Press **Create plan**.

Changing a price or benefits

On the plan card press **Edit price & details**, change what you need, and **Save**.

> IMPORTANT: WHAT A PRICE CHANGE AFFECTS
> A new price applies to **invoices issued from now on**, including automatic renewals. **Invoices already issued never change.** People already on the plan simply pay the new price from their next renewal.

Archiving a plan

Archive stops a plan being offered to new members. People already on it stay on it and keep renewing. **Restore** brings it back. Archived plans are shown faded.

SAMPLE DATA

Create **Startup Desk** with price **₹17,999** and cycle **Quarterly**. The price is for the whole cycle, so each member is invoiced ₹17,999 + GST every 3 months. Benefits: dedicated desk, 10 meeting-room hours, 2 visitor passes per month.

Later you raise Flexi to ₹4,299: Aarav's next renewal invoice is ₹4,299 + GST; his October invoice (₹4,718.82) stays as it was.

8.3 Assigning a membership

Memberships › Assign membership or Member page › Membership

Owners, managers and finance can start a plan for any member.

Field	Notes
Member	Pick from your people.
Plan	Shows the price next to each plan.
Start date	Defaults to today. The renewal date is the start date plus one billing cycle.
Location	Defaults to the location chosen in the top selector. Used for location reports.
Coupon code	Optional (8.5).
Email the invoice	Ticked by default. Sends the invoice to the member if email is set up.

Press **Start membership & issue invoice**. In one step the system creates the membership, issues invoice *INV-YYYY-NNNN* (plan price + 18% GST, due in 7 days) and tells the member through a notification.

SAMPLE DATA

Member **Aarav Reddy** · Plan **Flexi** · Start **5 Oct 2026** · Location Hyderabad.

- Renewal date: **5 Nov 2026**
- Invoice **INV-2026-0231**: ₹3,999.00 + CGST ₹359.91 + SGST ₹359.91 = **₹4,718.82**, due **12 Oct 2026**

> **MONTH-END DATES**
> Renewal dates never fall on a day that does not exist. A plan started on 31 January renews on 28 February (29 in a leap year), and then on 28 March.

8.4 Pausing and cancelling

In the memberships table (and on the member's page) use the buttons on each row:

Button	Effect
Pause	Status becomes `paused`. No renewal invoices are issued. History is kept.
Resume	Status returns to `active`. The existing renewal date is kept; if it has already passed, the next daily run issues the invoice.
Cancel	Asks you to confirm, then ends the plan for good (`cancelled`). The date is recorded and counted in churn reports. To restart, assign a new plan.

8.5 Coupons

Memberships › Coupons

Coupons give discounts on invoices. Owners and managers create them; anyone who creates an invoice, starts a plan or orders a service can type a code.

Field	Rules
Code	3 to 40 letters, numbers, `-` or `_`. Capitalised automatically. Must be unique.
Type	**Percent off** (a whole number from 1 to 100) or **Fixed ₹ off**.
Value	The percentage, or the rupee amount.
Max uses	Optional. Once reached, the coupon stops working. Two people cannot both use the last one.
Valid until	Optional last day. After it, the coupon is refused.

The list shows each coupon with how many times it has been used. **Disable** / **Enable** switches it off or on without deleting history.

How the discount is calculated

The discount comes off the **price before GST**, and GST is charged on what is left. This is the correct treatment for a discount given at the time of invoicing, and the invoice shows both.

WORKED EXAMPLE: FLEXI ₹3,999 WITH TWO COUPONS

Step	WELCOME10 (10% off)	FLAT500 (₹500 off)
Price before GST	₹3,999.00	₹3,999.00
Discount	– ₹399.90	– ₹500.00
Taxable value	₹3,599.10	₹3,499.00
GST 18%	₹647.84	₹629.82
Total payable	**₹4,246.94**	**₹4,128.82**

TIP

Make launch offers time-limited and use-limited: **WELCOME10** with *Max uses 100* and *Valid until 31 Dec 2026*. You will see exactly how many members took it.

CHAPTER 9

Companies

Many members belong to a business. A company record lets you keep its GSTIN and billing address, link its people, see what it owes, and bill it on one GST invoice.

9.1 The Companies page

Sidebar › Companies

Owners, managers and finance see a card for each company: name, GSTIN, billing email, address, **members** linked to it, and **Outstanding** (the total of its unpaid invoices).

9.2 Adding and editing a company

1. Press **New company**.
2. Fill in **Company name** (required), **GSTIN** (15 characters, optional), **Phone**, **Billing email** and **Billing address**.
3. Press **Save company**.

SAMPLE DATA

Field	Value
Company name	**Zenith Labs Pvt Ltd**
GSTIN	36ABCDE1234F1Z5 (fictional; "36" is Telangana's state code)
Billing email	accounts@zenithlabs.example
Phone	+91 40 5555 0142
Billing address	2nd Floor, Madhapur, Hyderabad 500081

Edit changes any detail. **Delete** removes the company from the list and unlinks its members; their accounts and all past invoices are untouched.

9.3 Linking members

Inside a company card, the **Add a member…** menu lists people who are not yet in it. Choose one to link them; press **Remove** beside a name to unlink. You can also pick the company when adding or editing a member (chapter 7).

9.4 Billing a company

When you create an invoice (chapter 11) choose **Bill to company**. The company name and GSTIN appear on the invoice above the contact person, and the company's **Outstanding** total updates automatically.

SAMPLE DATA

Zenith Labs has two members: **Aarav Reddy** and **Priya Sharma**. You create one invoice for 2 Flexi desks (2 × ₹3,999 = ₹7,998 + GST ₹1,439.64 = **₹9,437.64**), choose *Bill to company: Zenith Labs Pvt Ltd*. Zenith's card now shows **Outstanding ₹9,437.64**.

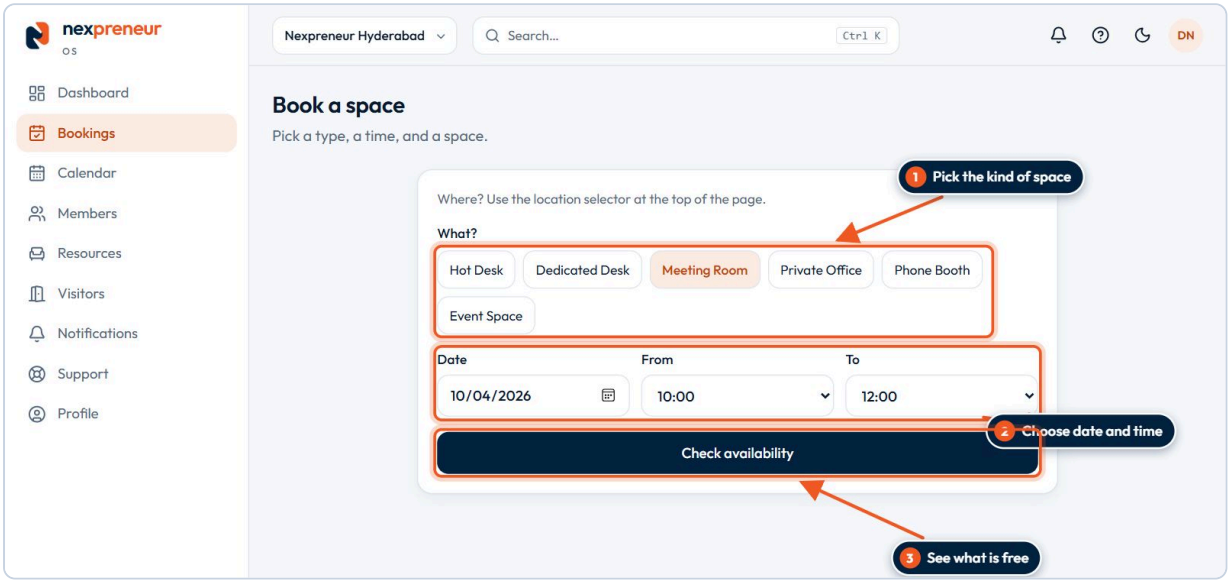

CHAPTER 10

Bookings, Calendar and Floor map

Booking is the heart of daily operations. Members book desks and rooms in a few taps; staff see everything at a glance; and the system makes sure two people can never book the same space at the same time.

10.1 Making a booking

Bookings › New booking

Booking a space, step by step

1 Choose the kind of space 2 Choose date and time 3 Check availability

1 Location	2 Type	3 When	4 Check	5 Choose	6 Review	7 Confirm
top-bar selector	desk, room...	date, from, to	availability	a space	price + GST	done

1. **Where?** Choose the location with the selector at the top of the page.
2. **What?** Tap a type: Hot Desk, Dedicated Desk, Meeting Room, Private Office, Phone Booth or Event Space.
3. **When?** Pick the **date** and the **From** and **To** times (every 30 minutes, 06:00 to 22:00).
4. Press **Check availability**. You see every space of that type with its price, and unavailable ones greyed with an *Unavailable* tag.
5. Tap the space you want. A **Review** card appears.
6. Check the **subtotal**, **GST 18%** and **total**, then press **Confirm booking**.

SAMPLE DATA

Aarav Reddy books **Meeting Room A** (capacity 6, ₹800/hour, before GST) on Mon **5 Oct 2026**, **10:00 – 12:00**.

2 hours × ₹800	₹1,600.00
GST 18%	₹288.00
Total	**₹1,888.00**

Other prices: a **Hot Desk** for the day is ₹300 + ₹54 GST = **₹354** (desks are charged per day whatever the hours). **Meeting Room B** 14:00 – 15:30 at ₹1,000/hour = ₹1,500 + ₹270 = **₹1,770**.

Rules the system enforces

- Bookings must fall between **06:00 and 22:00** and last at most **12 hours**.
- The start cannot be in the past, and the end must be after the start.
- **No double-booking.** When you press Confirm the system locks the space for a moment and re-checks. If someone else took it a second earlier, you see "Sorry, that slot was just taken. Pick another time."
- Resources marked Reserved, Maintenance or Unavailable cannot be booked.

PAYMENT FOR BOOKINGS

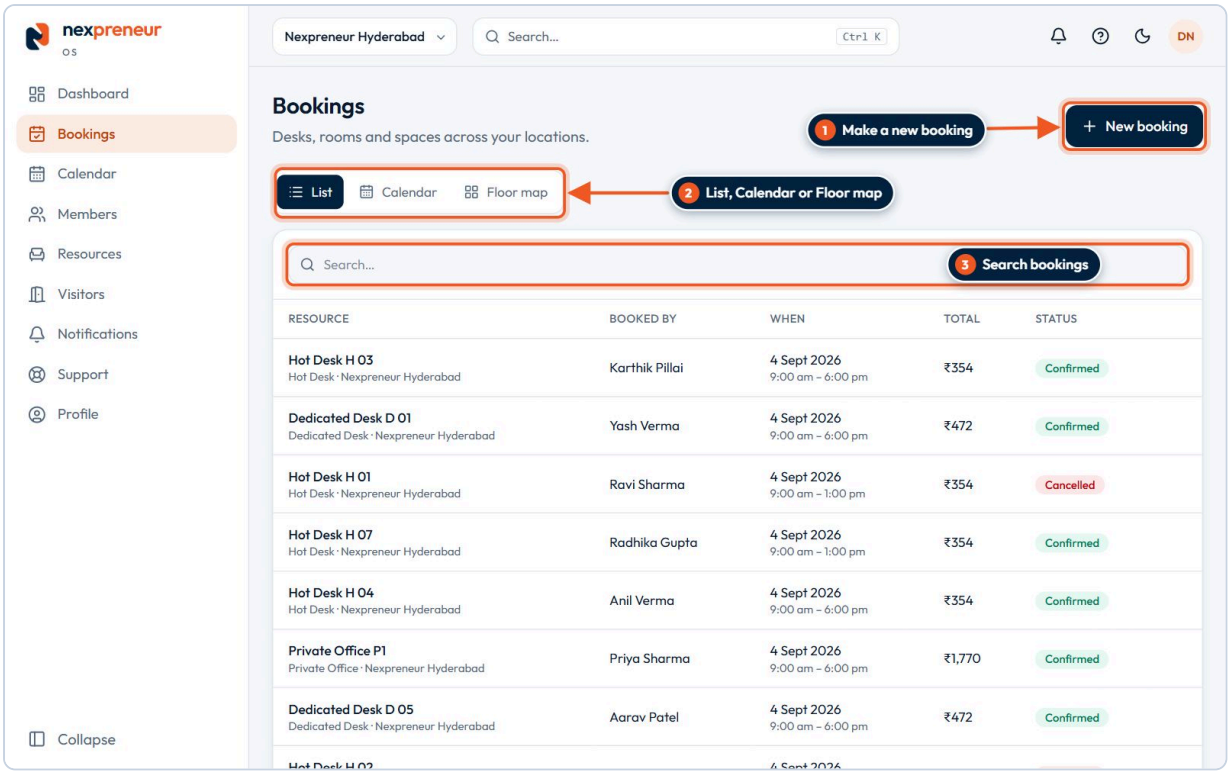

A confirmed booking shows the amount payable including GST, which is collected at reception. Bookings do not currently create an invoice by themselves; if you want a booking billed on a GST invoice, create an invoice (chapter 11) or use a membership plan that includes the hours.

BOOKING STATUSES

Confirmed and Cancelled are used today. The labels Pending, Completed and No Show exist for future use. A booking in the past simply stays Confirmed.

10.2 The three views

Bookings (tabs: List · Calendar · Floor map)

The bookings list

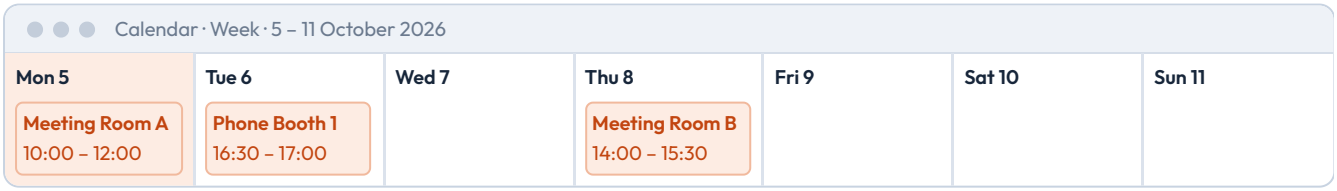

1 New booking 2 Switch between List, Calendar and Floor map 3 Search

List

A searchable table of bookings from 60 days ago to 60 days ahead: space, booked by, date and time, total, status. Members see only their own; staff see everyone's. Future bookings have a **Cancel** button (a confirmation appears). Members can cancel only their own; reception and managers can cancel any, and the member is notified.

Calendar

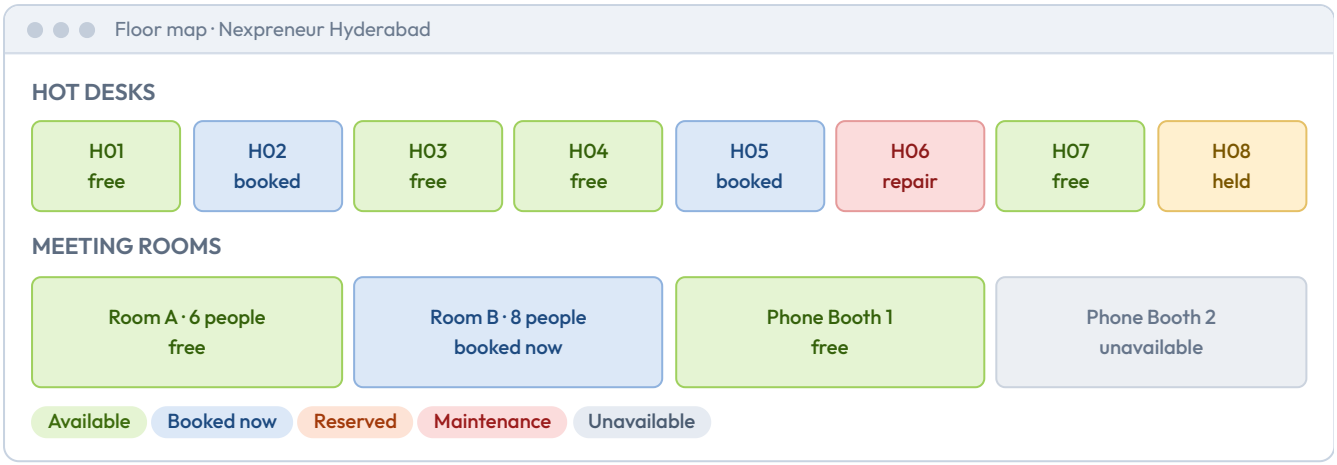

Switch between **Day**, **Week** and **Month**. Use the arrows to move and **Today** to jump back. Each booking is a small block with the space name and time. In Month view each day shows up to three bookings and a "+N more" counter. Cancelled bookings are hidden.

Sample week. Today's column is highlighted.

Floor map

Every resource is a coloured tile, grouped by type, showing its status **right now**. Press a tile to open a side panel with the name, capacity, price, status, today's bookings and a **Book this...** button.

Sample floor map. The map is a grouped grid, not a drawn architectural plan.

10.3 Cancelling a booking

1. Bookings › **List**, find the booking (search by space or person).
2. Press **Cancel** and confirm.

The slot becomes free immediately and the person gets a “Booking cancelled” notification (noting if the front desk cancelled it). Past bookings cannot be cancelled.

10.4 Tips for front desk and staff

- Use the **Calendar › Day** view each morning to see the day’s meetings.
- If a room is being repaired, set it to **Maintenance** in Resources (chapter 6) so nobody books it; you do not need to cancel anything unless there are already bookings.
- Members can book from their phone. If someone cannot, you can sign in and book for yourself, but bookings are always made for the signed-in person.

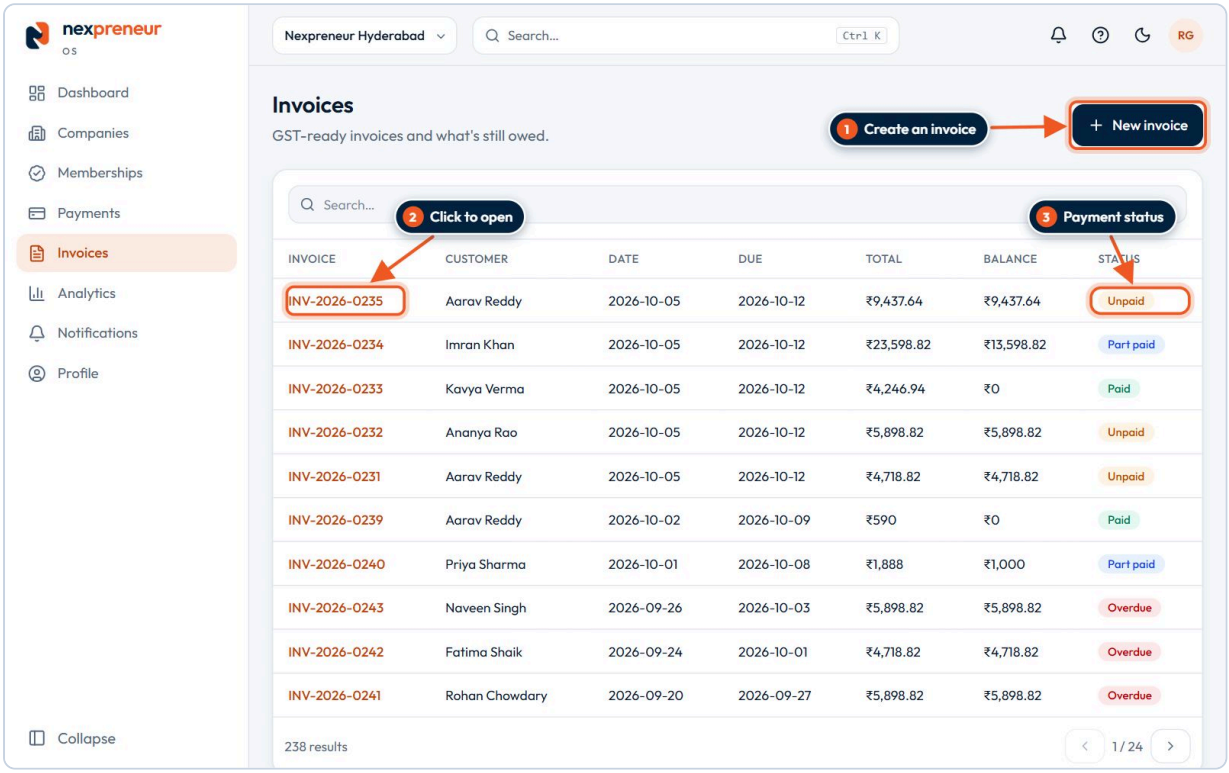

CHAPTER 11

Invoices and GST

Every charge in Nexpreneur OS becomes a numbered, GST-ready tax invoice: plans, event tickets, services and anything you create by hand. This chapter explains the invoice list, creating invoices, how GST is split, and printing or emailing.

11.1 The invoice list

Sidebar › Invoices

The invoice list
1 New invoice 2 Click an invoice number to open it 3 Payment status

Finance roles and managers see every invoice. Members and community managers see only their own. Columns: invoice number, customer, date, due date, total, balance and status.

Status	Meaning
Unpaid	Nothing paid yet and not past its due date.
Part paid	Some money received; a balance remains.
Paid	Fully paid.
Overdue	Unpaid or part paid and the due date has passed (worked out automatically each day).
Void	Cancelled before any payment. Kept for the record; cannot be paid.

Invoice numbers are **sequential per year** with no gaps or duplicates: `INV-2026-0001`, `INV-2026-0002` … A new year restarts at 0001.

11.2 Creating an invoice by hand

Invoices › New invoice

Owners, managers and finance can bill anything not already covered by a plan, event or service.

Field	Notes
Customer	The member the invoice is issued to.
Due in (days)	0 to 120. Default 7.
Bill to company	Optional. Fills in the company's GSTIN.
Customer GSTIN	Optional, 15 characters.
Location	Defaults to the top-bar selection. Used for location reports.
Coupon code	Optional (8.5).
Customer is in another state (IGST)	Tick if the customer is outside Telangana (see 11.3).
Email it to the customer	Ticked by default when email is set up.
Lines	Description, quantity, unit price (₹, before GST), GST rate (0, 5, 12, 18 or 28%). Add as many lines as you need (up to 30).

A live summary under the lines shows subtotal, CGST/SGST or IGST and total before you press **Create invoice**.

SAMPLE DATA

Customer: **Ananya Rao** (BluePeak Studio) · Due in 7 days · Location: Hyderabad

Description	Qty	Rate	GST	Amount
Meeting Room B, 14 Oct (3 hours)	3	₹1,000.00	18%	₹3,000.00
Projector hire	1	₹500.00	18%	₹500.00
Subtotal ₹3,500.00 + CGST ₹315.00 + SGST ₹315.00 = Total				**₹4,130.00**

11.3 How GST is worked out

Your business is registered in **Telangana**. The system applies GST like this:

Customer location	Tax shown on the invoice
Same state (Telangana)	**CGST** + **SGST**, each half of the GST. At 18%: 9% + 9%.
Another state (tick "IGST")	**IGST**, the full GST. At 18%: 18%. The total is the same; only the split differs.

GST is calculated on the invoice as a whole and rounded to the nearest paisa; if the tax cannot be split evenly, the extra paisa goes to SGST so the lines always add up exactly.

WORKED EXAMPLE: FLEXI PLAN ₹3,999

Line	Customer in Telangana	Customer in Karnataka
Subtotal	₹3,999.00	₹3,999.00
CGST 9%	₹359.91	—
SGST 9%	₹359.91	—
IGST 18%	—	₹719.82
Total	**₹4,718.82**	**₹4,718.82**

SAC codes printed per line: plans and bookings use `997212` (rental of commercial property); event tickets `999699`; services `998599`. Your tax adviser can confirm the right codes for your case.

11.4 The invoice page

Click an invoice number. You see a printable **Tax Invoice** and, below it, actions for your role.

Invoices › INV-2026-0231

Tax Invoice
INV-2026-0231

Nexpreneur
GSTIN 36AAAAA0000A1Z5
Unpaid

Billed to
Zenith Labs Pvt Ltd
Aarav Reddy
aarav@zenithlabs.example

Issued
2026-10-05

Due
2026-10-12
Place of supply: Telangana

Description	SAC	Qty	Rate	GST	Amount
Flexi membership (2026-10-05 to 2026-11-05)	997212	1	₹3,999.00	18%	₹3,999.00

Subtotal	₹3,999.00
CGST	₹359.91
SGST	₹359.91
Total	**₹4,718.82**
Paid	₹0.00
Balance due	**₹4,718.82**

Sample tax invoice. Seller GSTIN is shown when you set it in server settings (chapter 25).

Button	What it does
Print / Save as PDF	Opens your browser's print window with only the invoice (menus are hidden). Choose *Save as PDF* as the printer to get a PDF file.
Email invoice / Email again	Sends the invoice to the customer's email with a *View & pay* link. (Finance roles; needs email set up.)
Pay ₹... online	Opens the Razorpay payment window (chapter 12) for the balance.
Record payment	For cash, UPI, bank transfer or card taken at the desk (chapter 12).

Button	What it does
Refund	Beside each payment. See 12.4.
Void invoice	Only for invoices with no payments. Cannot be undone.

Members open the same page from their own invoice list or the “View & pay” email link and can pay online or print it.

11.5 Discounts and company details on an invoice

When a coupon was used, the invoice shows a **Discount (CODE)** line between Subtotal and tax. When billed to a company, the company name and GSTIN appear above the contact person.

CHAPTER 12

Payments, online payment and refunds

Money comes in two ways: members pay online through Razorpay, or staff record what was paid at the desk. Either way the invoice updates by itself.

12.1 The Payments page

Sidebar › Payments

A list of payments with date, invoice, customer, method, amount and status, plus an **Outstanding** card showing what is still owed. Members see only their own payments; finance roles see everyone's.

12.2 Recording a payment at the desk

Invoice › Record payment

1. Open the invoice.
2. In **Pay this invoice**, set the **Amount** (it starts as the full balance, and cannot be more).
3. Choose the **Method**: Cash, UPI, Bank transfer or Card. Add a **Note** such as a UTR number.
4. Press **Record payment**.

The invoice moves to Part paid or Paid and the member gets a "Payment received" notification.

SAMPLE DATA: PART PAYMENTS

Invoice **INV-2026-0231**, total ₹4,718.82.

Date	Action	Amount	Balance	Status
5 Oct	Issued	—	₹4,718.82	Unpaid
6 Oct	Cash at desk	₹2,000.00	₹2,718.82	Part paid
9 Oct	UPI, UTR 4098…	₹2,718.82	₹0.00	Paid

12.3 Paying online with Razorpay

When online payments are switched on (chapter 25), a **Pay ₹… online** button appears on unpaid invoices for the member and for staff.

1. Press the button. The amount is the invoice balance as held by the system; it cannot be edited in the browser.
2. The Razorpay window opens. Pay by UPI, card, netbanking or wallet.
3. On success the invoice is marked paid within seconds, and a receipt notification is sent.

> **HOW IT STAYS SAFE**
> Every online payment is verified three ways: Razorpay's signature is checked, the system asks Razorpay directly what was paid, and a webhook from Razorpay confirms it again. A payment is recorded exactly once even if the member's browser closes at the wrong moment.

If online payment is not switched on, the page says "Online payment isn't enabled yet. Please pay at reception."

12.4 Refunds

Invoice › Payments list › Refund

Owners, managers and finance can refund part or all of a payment.

1. On the invoice, find the payment and press **Refund**.
2. Set the **amount** (up to what has not been refunded yet) and an optional **reason**.
3. Press **Refund**.

Payment method	What happens
Online (Razorpay)	The refund is sent to Razorpay first and returns to the customer's card or UPI. Only if Razorpay accepts is it recorded.
Cash, UPI, bank, card at the desk	The system records the refund; **you hand the money back** yourself.

The invoice's paid amount goes down and its status updates (Paid → Part paid → Unpaid). The payment shows "refunded ₹…", the customer gets a notification, and the action is written to the audit log.

SAMPLE DATA

Aarav paid **₹4,718.82** by UPI; the desk is asked to refund **₹1,000** for an unused day pass. After the refund: payment shows *refunded ₹1,000.00*; the invoice shows Paid ₹3,718.82, **Balance due ₹1,000.00**, status Part paid. Refunding the remaining ₹3,718.82 later marks the payment *refunded* in full.

> **CAREFUL**
> Refunds cannot be undone. Check the amount twice. To remove an unpaid invoice use **Void** instead; a voided invoice cannot have payments.

CHAPTER 13

Automatic renewals and payment reminders

You do not have to remember renewal dates or chase payments. A daily job issues the next invoice for each active membership and nudges members who have not paid.

13.1 Renewal invoices

Each day the job looks at every **active** membership whose renewal date is within **3 days**. For each one it:

1. Issues a new invoice for the plan at **today's plan price** + GST, describing the period ("Flexi membership renewal (2026-11-05 to 2026-12-05)").
2. Moves the membership's renewal date forward by one billing cycle.
3. Notifies the member ("Flexi renews on 2026-11-05. Your renewal invoice is ready") and emails the invoice.

Paused and cancelled memberships are skipped. Running the job twice in a day never creates duplicates.

SAMPLE DATA: AARAV'S TIMELINE

Date	What happens
5 Oct	Flexi starts. Invoice INV-2026-0231 (₹4,718.82), due 12 Oct. Renewal date set to 5 Nov.
2 Nov	Daily job: renewal date is 3 days away. Invoice for 5 Nov – 5 Dec issued and emailed, due 5 Nov. Renewal date becomes 5 Dec.
3 Nov	Invoice is due within 2 days: first payment reminder (email + notification).
6 Nov	Not paid and now overdue: second reminder (3 days after the first).
7 Nov	Aarav pays online; reminders stop.

13.2 Payment reminders

Invoices that are unpaid or part paid get a reminder when they are **due within 2 days** or **overdue**. Rules:

- At most **one reminder every 3 days** per invoice, and at most **5 in total**, so nobody is nagged forever.
- Each reminder is an **in-app notification** and, if email is set up, an **email** with a View & pay link.
- Reminders stop as soon as the invoice is paid, voided or fully refunded.

13.3 Making the daily job run

The job runs when a scheduler calls a private web address once a day. Setup is a one-time task for the administrator (chapter 25.8). If the job is not scheduled, nothing breaks, but renewals and reminders do not happen automatically.

> **WHAT THE JOB REPORTS**
> A successful call returns a short message such as `{"ok":true,"renewals":{"issued":2,"errors":0},"reminders":{"sent":3,"errors":0}}`. Zeros are normal on a quiet day.

CHAPTER 14

Visitors and check-in

Members invite guests ahead of time and share a QR code. When the guest arrives, reception checks them in with a few clicks, and the host is told straight away.

14.1 Inviting a visitor (members and staff)

Sidebar › Visitors › Invite visitor or Home › Invite Visitor

1. Enter the visitor's **name**, optional **phone** and optional **email**.
2. Pick the **date** (today or later) and **time**, and write the **purpose** ("Client meeting").
3. Press **Generate QR invitation**.

A card appears with a **QR code** and a 32-character **code**. If you entered the visitor's email and email is set up, they already received an email with the QR code inside it, plus the host name, date and time. If not, screenshot the QR or copy the code and send it yourself.

SAMPLE DATA

Host: **Priya Sharma** · Visitor: **Karthik Naidu**, +91 99887 76655, karthik@clientco.example · Monday **5 Oct 2026, 14:00** · Purpose: **Product demo**

Code (example): `9f2c41ab7d3e4c05a1b8e6f0d27c9a34`

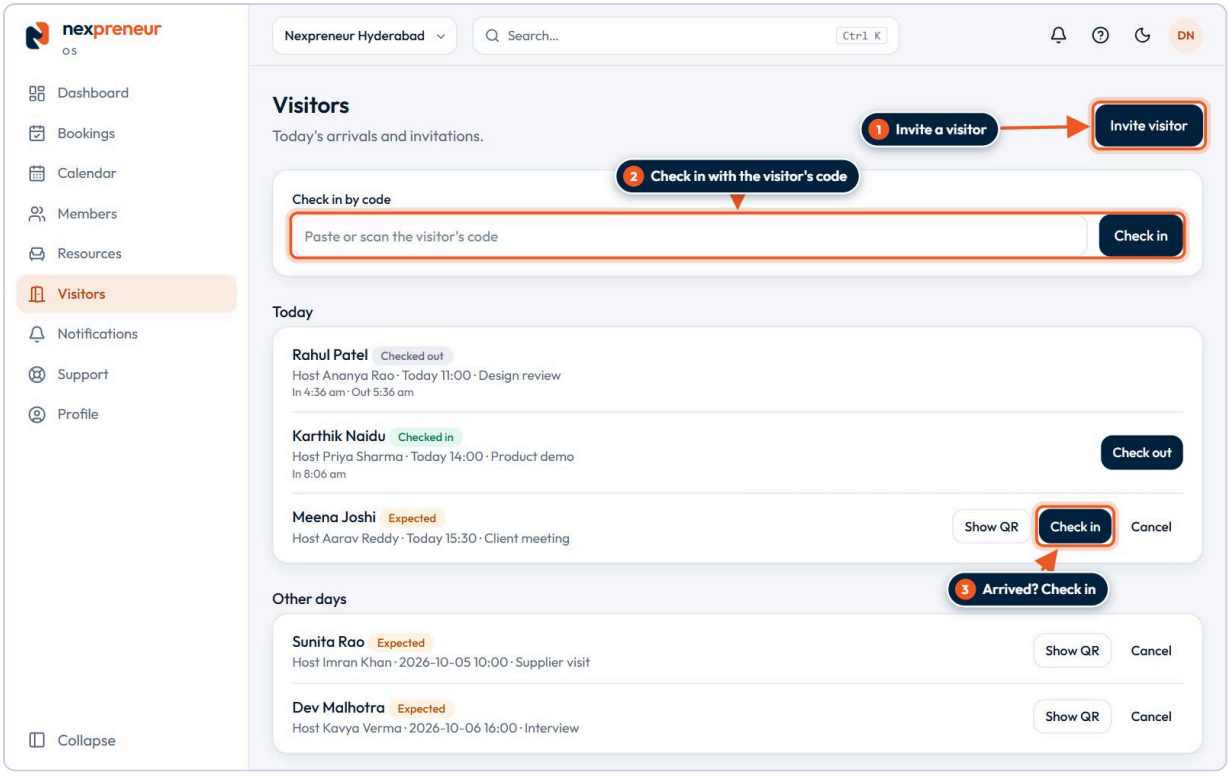

Karthik's email: *"Priya Sharma has invited you to Nexpreneur. 2026-10-05 at 14:00 (Product demo). Show this QR code at reception."*

Under **Today** and **Other days** each invitation shows a status:

Status	Meaning
Expected	Invited, not arrived.
Checked in	On site. The check-in time is shown.
Checked out	Left. Check-out time shown.
Cancelled	The host cancelled.

Hosts can press **Show QR** to see it again, **Resend** to re-email the visitor, or **Cancel** while the status is Expected.

14.2 Checking visitors in and out (front desk)

Visitors at the front desk
1 Invite a visitor 2 Check in by code 3 Check a visitor in when they arrive

Reception, staff, managers and owners see everyone's invitations. Two ways to check a guest in:

By code

At the top of the page, type or paste the visitor's code into **Check in by code** and press **Check in**.

From the list

Under **Today**, press **Check in** next to the guest. Later press **Check out** when they leave.

SAMPLE DATA

Visitor	Host	Time	Status
Karthik Naidu	Priya Sharma	14:00	Checked in In 13:52
Meena Joshi	Aarav Reddy	15:30	Expected
Rahul Patel	Ananya Rao	11:00	Checked out 11:05 – 12:20

When Karthik is checked in, **Priya Sharma** receives a notification: "Karthik Naidu has arrived".

What the system checks

- A code only works on the **date of the visit**. Anything else shows "This invitation is for 2026-10-06, not today".
- A guest cannot be checked in twice ("Karthik Naidu is already checked in").
- Only reception, staff, managers and owners can check people in or out; hosts cannot do it for their own guests.

- A wrong code shows “No invitation found for that code”.

> **TIP**
> A camera scanner is not built in. Copy-paste the code, or have the visitor read it out. Most QR scanner apps on a phone copy the code to the clipboard, which you can paste into the box.

CHAPTER 15

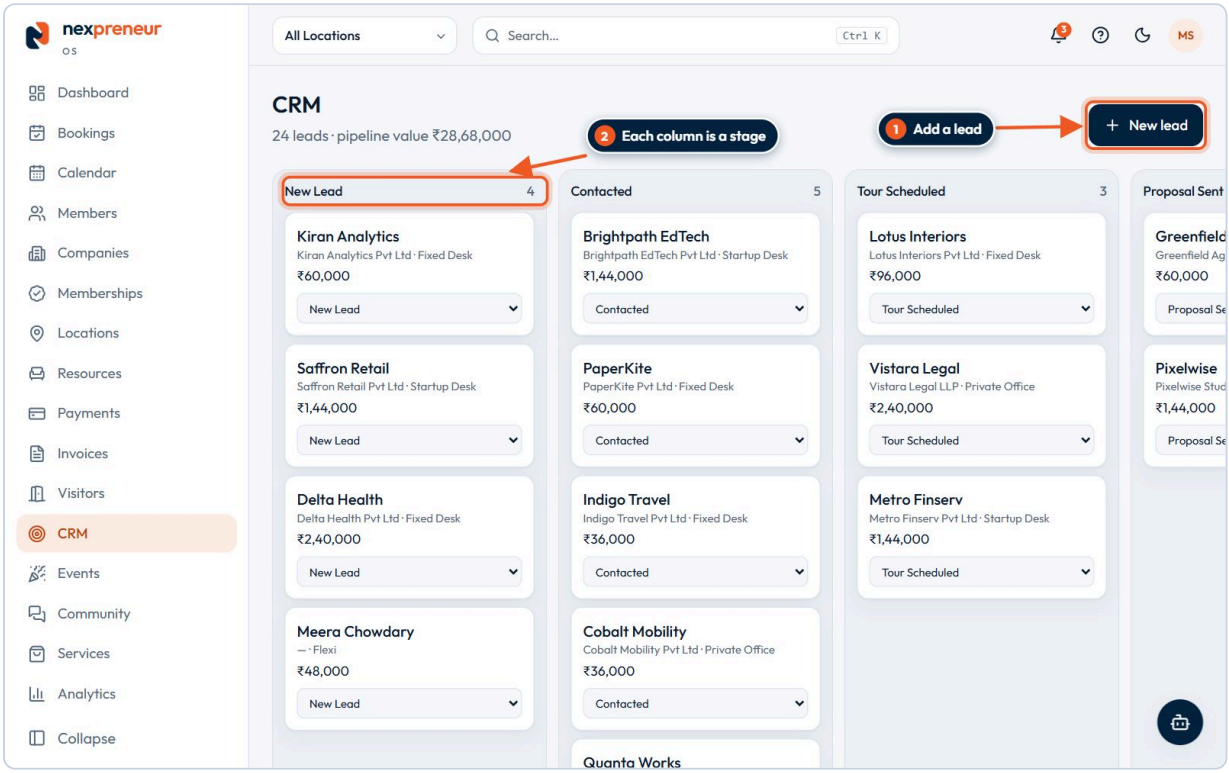

CRM: your sales pipeline

Every coworking space lives on enquiries. The CRM keeps each lead, what they want, who spoke to them and where they are in the sale. It is available to owners, super admins and location managers.

15.1 The board

Sidebar › CRM

Leads are cards in seven columns. The header shows the number of leads and the **pipeline value**: the total expected value of every lead that is not Lost.

The CRM board (a column for each stage)
1 Add a lead 2 A stage; use the box on a card to move it

15.2 Adding a lead

1. Press **New lead**.
2. Fill in **Name** (required), **Company**, **Phone**, **Email**, **Interested plan**, **Expected value (₹)** and **Requirements**.
3. Press **Add lead**. It starts in **New Lead**.

SAMPLE DATA

Name: **Vistara Legal** · Company: Vistara Legal LLP · Phone +91 90000 11122 · Email: office@vistara.example · Interested plan: **Private Office** · Expected value: **₹2,40,000** (12 months × ₹19,999 ≈ ₹2.4 lakh) · Requirements: *Office for 5 lawyers, start 1 Nov, needs meeting room 10 h/month.*

15.3 Moving a lead through the pipeline

- **Drag and drop** a card to another column (computer).
- Or use the small **drop-down on the card** to choose a stage (works well on phones).

The change is shown instantly. If saving fails, the card jumps back and an error appears. Every stage change is written into the lead's timeline.

15.4 The lead drawer: notes, calls and timeline

Click a lead's name to open a side panel with all its details and an **Activity** timeline.

1. Choose **Note** or **Call log**, type what happened or the follow-up needed, and press **Add to timeline**.
2. Entries are listed newest first with date and time. Stage moves appear automatically ("Moved from Contacted to Tour Scheduled").

SAMPLE TIMELINE

4 Oct 2026, 11:20	Moved from **Contacted** to **Tour Scheduled**
3 Oct 2026, 16:05	*Call log:* Spoke to the managing partner. Wants to tour on Tuesday 6th at 5 PM. Send brochure.
2 Oct 2026, 10:40	*Note:* Enquiry came via website. Currently in a 4-person rented office; lease ends 31 Oct.

WHEN A LEAD IS WON

Moving a lead to **Won** does not create a member automatically. Add them as a member (chapter 7) and start their plan so they are invoiced. Won leads feed your **lead conversion** figure in Analytics.

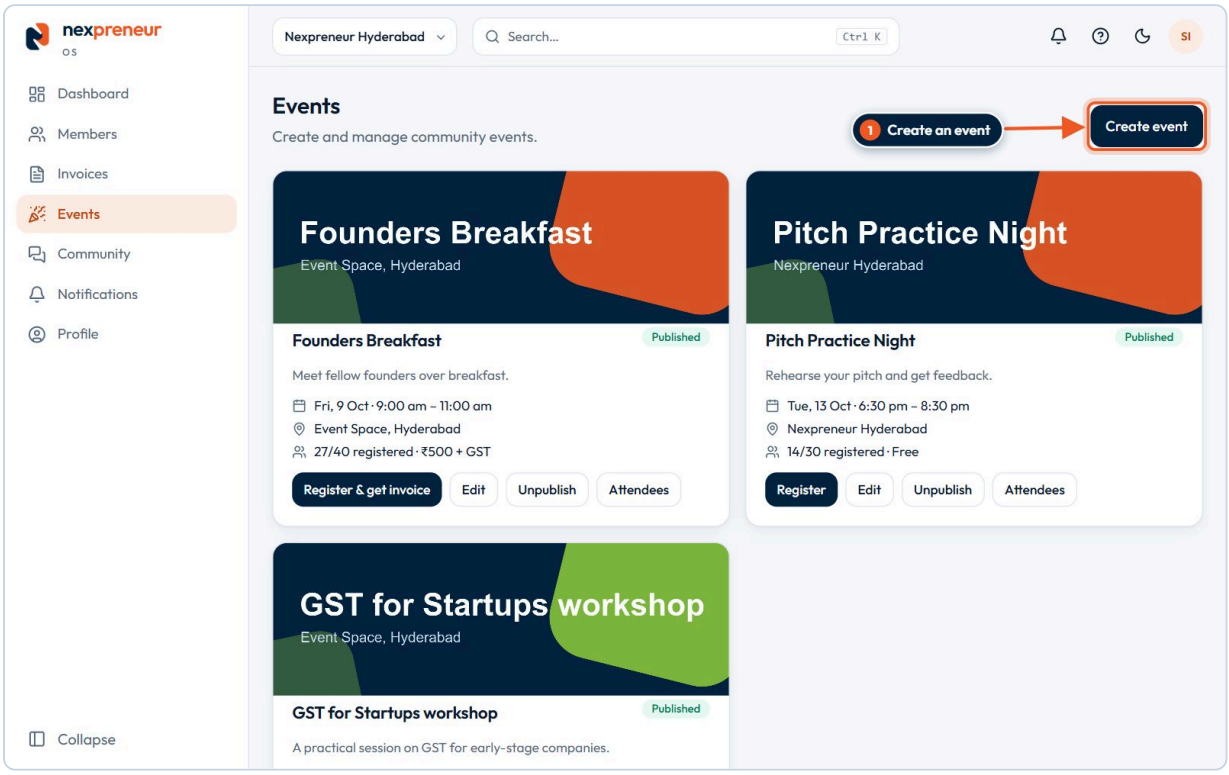

CHAPTER 16

Events

Workshops, meetups, demo days: publish an event with a photo, set a capacity and optional ticket price, and let members register in one tap. Paid tickets create a GST invoice automatically.

16.1 Creating an event (owners, managers, community managers)

Sidebar › Events › Create event

Events
1 Create an event

Field	Notes
Title	3 to 160 characters.
Description	Up to 2,000 characters.
Date, Starts, Ends	India time, in 30-minute steps. End must be after start. Creating an event in the past is refused.
Venue	For example “Event Space, Hyderabad”.
Capacity	Maximum number of registrations.
Ticket price	Rupees before GST. 0 means free.
Organizer	Name shown on the event.
Event image	Optional JPEG, PNG or WebP. Photos are shrunk automatically to a sensible size (largest side 1,200 pixels) before upload.
Publish now	Tick to show it to members. Untick to keep it as a draft.

SAMPLE DATA

Title: **Founders Breakfast** · Friday **9 Oct 2026**, 09:00 – 11:00 · Venue: Event Space, Hyderabad · Capacity **40** · Ticket **₹500** (+ GST) · Organizer: Sneha Iyer · Image: photo of the space · Published.

Ticket cost to a member: ₹500 + 18% GST (₹90) = **₹590**.

16.2 Managing events

Each event card shows the image, date and time, venue, **registered / capacity** and price. Managers have buttons:

Button	What it does
Edit	Opens the form filled in. You can change anything. Capacity cannot go below the number already registered. A new price applies to people who register from now on.
Publish / Unpublish	Shows or hides the event from members. Drafts are labelled in grey.
Attendees	Lists the name and email of everyone registered.

16.3 Registering as a member

1. Open **Events** and find the event.
2. Press **Register** (free) or **Register & get invoice** (paid).
3. For a paid event, a green message links to your **ticket invoice**. Open it and pay online. The invoice is due in 3 days.

The card then says **You're going**. To change your mind press **Cancel registration** (before the event starts); your seat is released. If the event is full the button reads **Full**.

> **CAPACITY IS EXACT**
> The system locks the event while it counts, so two people registering for the last seat at the same moment cannot both get it.

CHAPTER 17

Community

A friendly feed where members share updates, jobs and questions, and a directory to find collaborators.

17.1 The feed

Sidebar › Community › Feed

Write in the box at the top, choose a **type**, and press **Post**.

Type	Use it for
Update	News about your work.
Opportunity	Projects, clients, partnerships.
Job	Hiring or looking for work.
Question	Ask the community for help.
Announcement	Official notices. Only owners, managers and community managers can post these. They are pinned to the top with a megaphone.

- **Like** with the heart (tap again to unlike).
- **Comment**: press the speech bubble, write, press **Reply**.
- **Delete**: the bin icon appears on your own posts; managers and community managers can delete any post.

SAMPLE DATA

Ananya Rao
Designer · BluePeak Studio

Job Looking for a freelance front-end developer for a 6-week landing-page project. DM me.
♡ 4 2 comments 3h ago

Sneha Iyer
Community Manager

Announcement Founders Breakfast this Friday 9 AM. Register under Events.
♡ 11 1d ago

17.2 Member directory

Community › Member directory

A searchable list of everyone in the space: **name, role and company only**. Emails and phone numbers are never shown here. Keep your own entry useful by filling in job title and company on your Profile.

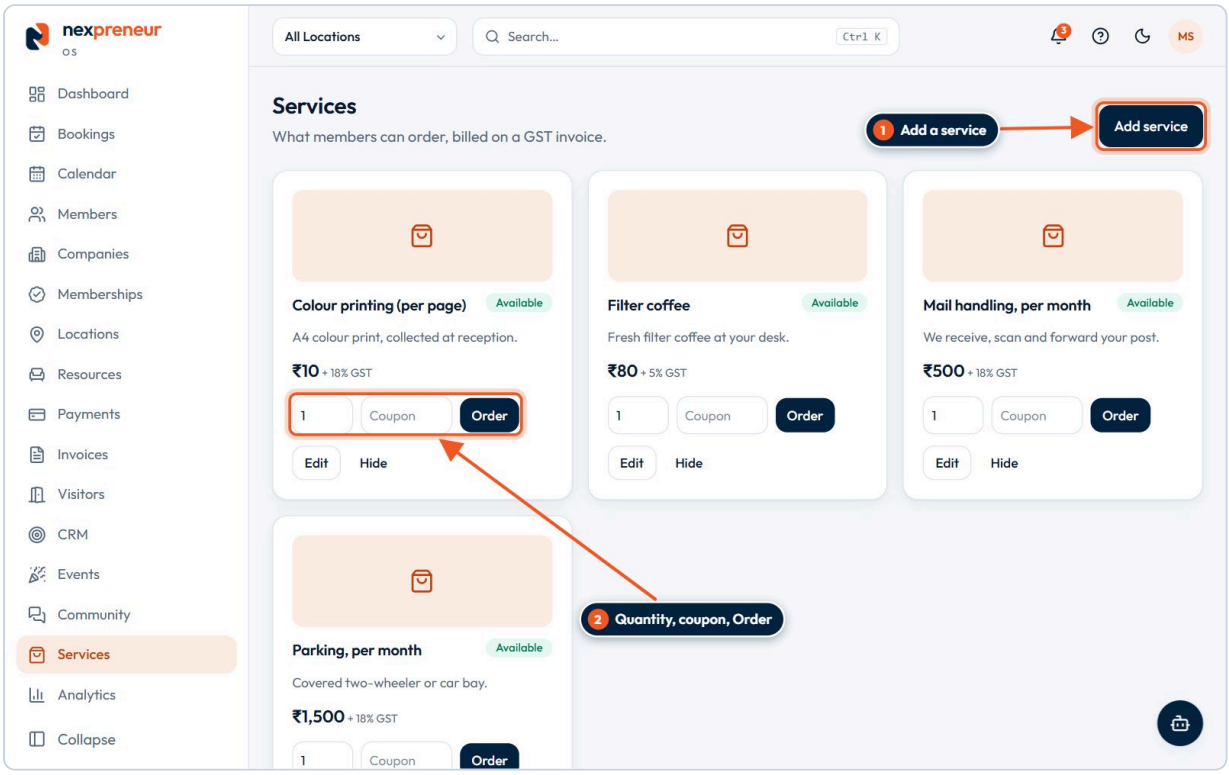

CHAPTER 18

Services marketplace

Printing, parking, coffee, mail handling, training: anything extra you sell. Members order in a tap and get a GST invoice automatically.

18.1 Offering services (owners and managers)

Sidebar › Services › Add service

Services members can order
1 Add a service 2 Quantity, coupon and Order

Field	Notes
Name, Description	What the member sees.
Price	Rupees before GST.
GST rate	0, 5, 12, 18 or 28%.
Image	Optional photo.
Available to order	Untick to hide it without deleting.

Use **Edit** on a card to change anything, including the price (new price applies to new orders), and **Hide / Make available** to switch it off or on. A list of **Recent orders** sits below.

SAMPLE DATA

Service	Price	GST	Member pays
Colour printing (per page)	₹10.00	18%	₹11.80 per page
Parking, per month	₹1,500.00	18%	₹1,770.00
Filter coffee	₹80.00	5%	₹84.00
Mail handling, per month	₹500.00	18%	₹590.00

18.2 Ordering (members)

1. Open **Services**.
2. On the service, set the **quantity** (1 to 50) and optionally a **coupon**.
3. Press **Order**. A green message links to your invoice.

The price always comes from the system, never from the browser. The order appears under **Your orders**.

SAMPLE DATA

Aarav orders **50 pages** of colour printing: 50 × ₹10 = ₹500 + GST ₹90 = **₹590**, invoice **INV-2026-0239**, due in 7 days.

CHAPTER 19

Support requests

A simple inbox so members can ask for help (“AC not working in Meeting Room A”) and your team can see and close requests.

Sidebar › Support

19.1 For members

1. Write a short **Subject** (3 to 160 characters) and the **Details** (5 to 2,000).
2. Press **Send request**. It appears below as Open.
3. When it is sorted, you are notified. You can also press **Mark as closed** yourself.

19.2 For owners, managers and reception

You see every request with the member’s name and time. Press **Mark as closed** when done; the member gets a notification. Closed requests stay in the list as Closed for the record.

SAMPLE DATA

Member	Subject	Status
Imran Khan	AC not working in Meeting Room A	Open
Kavya Verma	Need a second key card for my desk	Closed

> **NOTE**
> Support requests do not currently have a back-and-forth reply thread. Reply to the member in person, by phone, or by email, then close the request.

CHAPTER 20

The Notification Centre

Important things reach you without you having to look for them. Notifications appear under the bell at the top of every page and in a full list.

20.1 What you are notified about

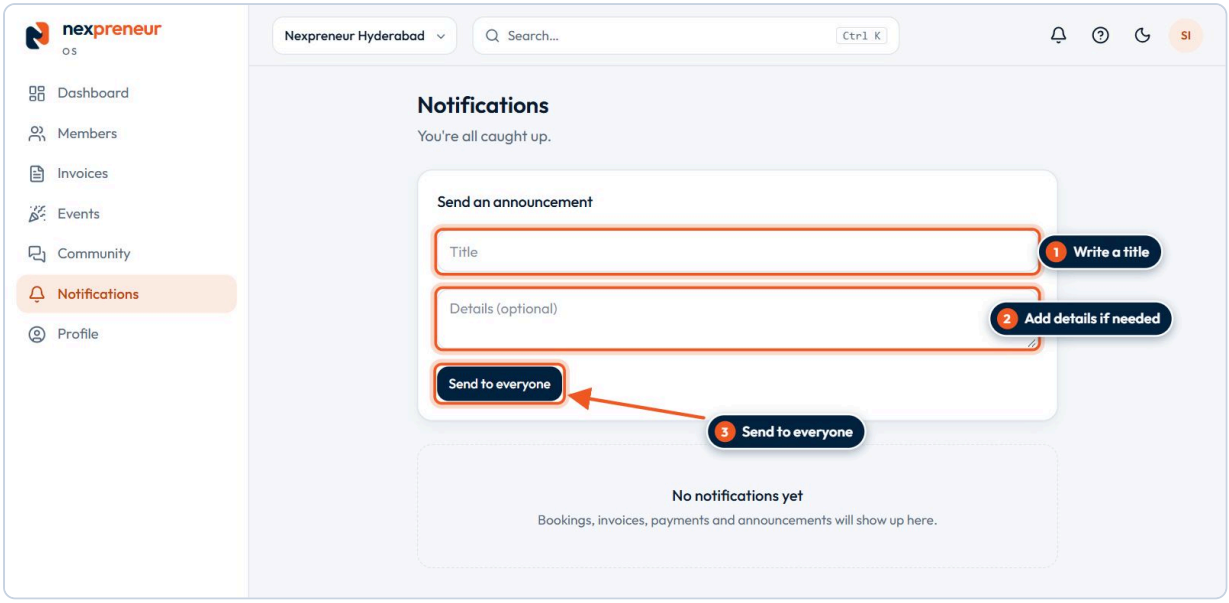

Type	When it appears	Who gets it
Booking	Booking confirmed; booking cancelled (including by the front desk)	The person who booked
Invoice	An invoice is issued (plan, renewal, event ticket, service, manual)	The customer
Payment	A payment is recorded or received online	The customer
Refund	A refund is issued	The customer
Renewal	A renewal invoice is ready (3 days before renewal)	The member
Reminder	An invoice is due soon or overdue	The customer
Event	You registered for an event	The member
Visitor	Your guest has arrived	The host
Support	Your request was closed	The member
Service	You ordered a service	The member
Announcement	A message from the team	Everyone active

20.2 Using it

- The bell shows the number of unread items (and “9+” if more) and refreshes about once a minute while the page is open.
- Open **Notifications** to see the list, newest first. Unread items have a tinted background and an orange dot.
- Click an item to open what it is about (an invoice, your bookings, events…) and mark it read. **Mark all as read** clears the bell.

> **NOTE**
> Notifications update about every minute rather than instantly. Email copies are sent for invoices, reminders and visitor invitations when email is set up.

20.3 Sending an announcement

Sending an announcement
1 Title 2 Details (optional) 3 Send to everyone

Owners, managers and community managers see **Send an announcement** on this page. Enter a **title** and optional **details** and press **Send to everyone**. Every active person in the organisation, members and staff, gets a notification; the screen tells you how many.

SAMPLE DATA

Title: **Hyderabad: power maintenance on Sunday 11 Oct** · Details: *The building will be closed 8 AM – 2 PM. Desks resume Monday.* → "Announcement sent to 94 people."

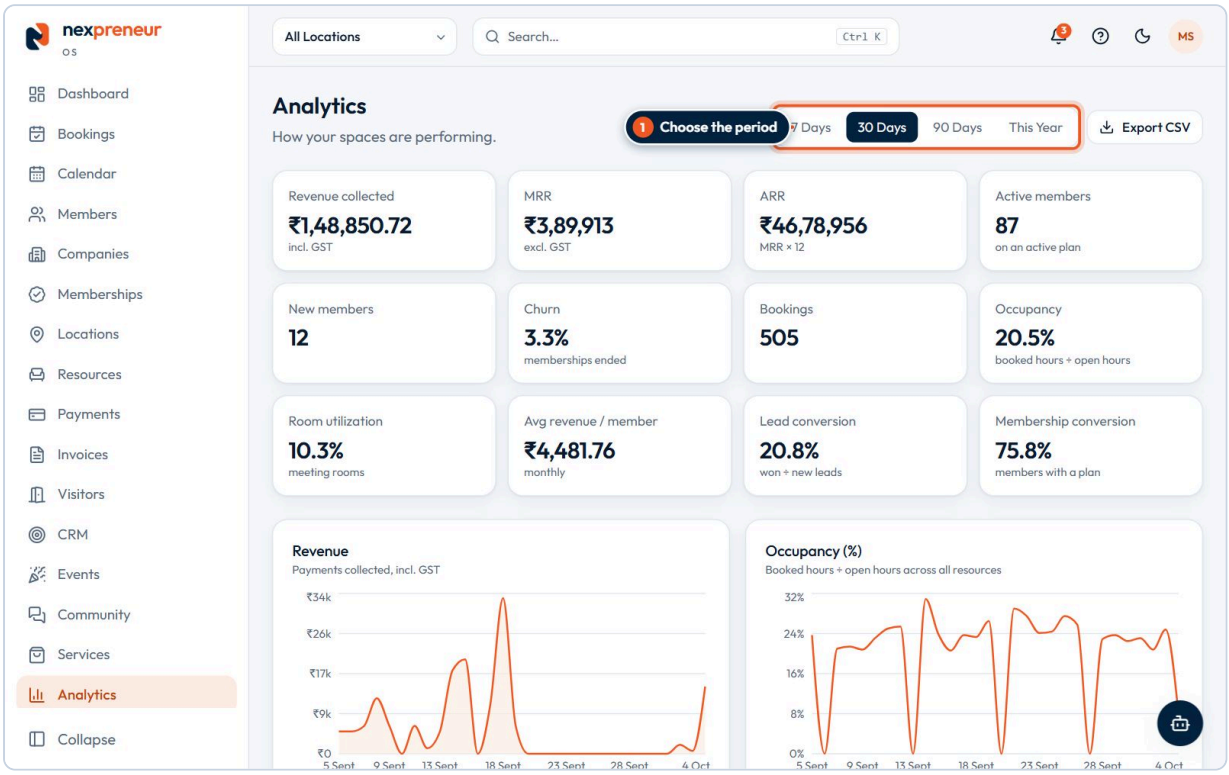

CHAPTER 21

Analytics and reports

Know how the business is doing: money, space use, members and sales. Available to owners, managers and finance. You can export everything to a spreadsheet.

21.1 Using the page

Sidebar › Analytics

Analytics
1 Choose the period

- Choose a period: **7 Days**, **30 Days**, **90 Days** or **This Year**.
- The **location selector** filters the page. Choose *All Locations* for the whole business.
- **Export CSV** downloads the numbers as a spreadsheet file (opens in Excel or Google Sheets), named for the period and location.

21.2 The twelve numbers, in plain words

Number	How it is worked out
Revenue collected	All payments received in the period, **including GST**.
MRR	Monthly recurring revenue: for every active membership, the plan price per month **before GST** (quarterly ÷ 3, yearly ÷ 12), added up.
ARR	Annual run-rate: MRR × 12.
Active members	People who currently have an active plan.

Number	How it is worked out
New members	People who joined in the period (for one location: whose first plan there started in the period).
Churn	Plans that ended in the period ÷ (active plans + plans that ended). A cancelled plan counts on its cancellation date.
Bookings	Confirmed and completed bookings starting in the period.
Occupancy	Booked hours ÷ open hours (06:00–22:00 every day) of all resources in the period.
Room utilization	The same, for meeting rooms only.
Avg revenue / member	MRR ÷ active members.
Lead conversion	Leads marked Won ÷ leads created in the period. Organisation-wide.
Membership conversion	People who have ever had a plan ÷ all members. Organisation-wide.

WORKED EXAMPLE: A 30-DAY REPORT FOR ALL LOCATIONS

In this example the business has 33 bookable resources, of which 3 are meeting rooms.

Number	Working	Result
MRR	40 × ₹3,999 + 22 × ₹4,999 + 5 × ₹19,999 + 20 × ₹999	₹3,89,913
ARR	₹3,89,913 × 12	₹46,78,956
Active members	40 + 22 + 5 + 20 = 87 people on plans	87
Avg revenue / member	₹3,89,913 ÷ 87	₹4,482
Churn	3 plans ended ÷ (87 + 3)	3.3%
Occupancy	about 3,247 booked hours ÷ (33 resources × 16 h × 30 days = 15,840)	20.5%
Room utilization	about 148 booked hours ÷ (3 rooms × 16 h × 30 days = 1,440)	10.3%
Lead conversion	5 won ÷ 24 new leads	20.8%
Membership conversion	91 have ever had a plan ÷ 120 members	75.8%

21.3 Charts and the location table

- **Revenue** (area), **Occupancy %** (line), **Member growth** (area, total members at the end of each period), **Bookings** (bars), **Churn** (bars of plans ended).
- Chart buckets: daily for 7 and 30 days, weekly for 90 days, monthly for This Year.
- **Location performance**: for each location the bookings, booking revenue and occupancy. This table always compares *every* location, whichever one you selected.

21.4 Reading the numbers wisely

THINGS TO REMEMBER

- **Occupancy** counts booked hours, not seats filled. A booked meeting room counts for every hour it is booked even with one person in it.
- Members who pay by **plan** and never book a space still count as active members but add nothing to occupancy.
- **Revenue collected** includes GST; **MRR** does not. They are not meant to match.
- Data created before the location filters existed was assigned to your first location when the system was upgraded.

The CSV file

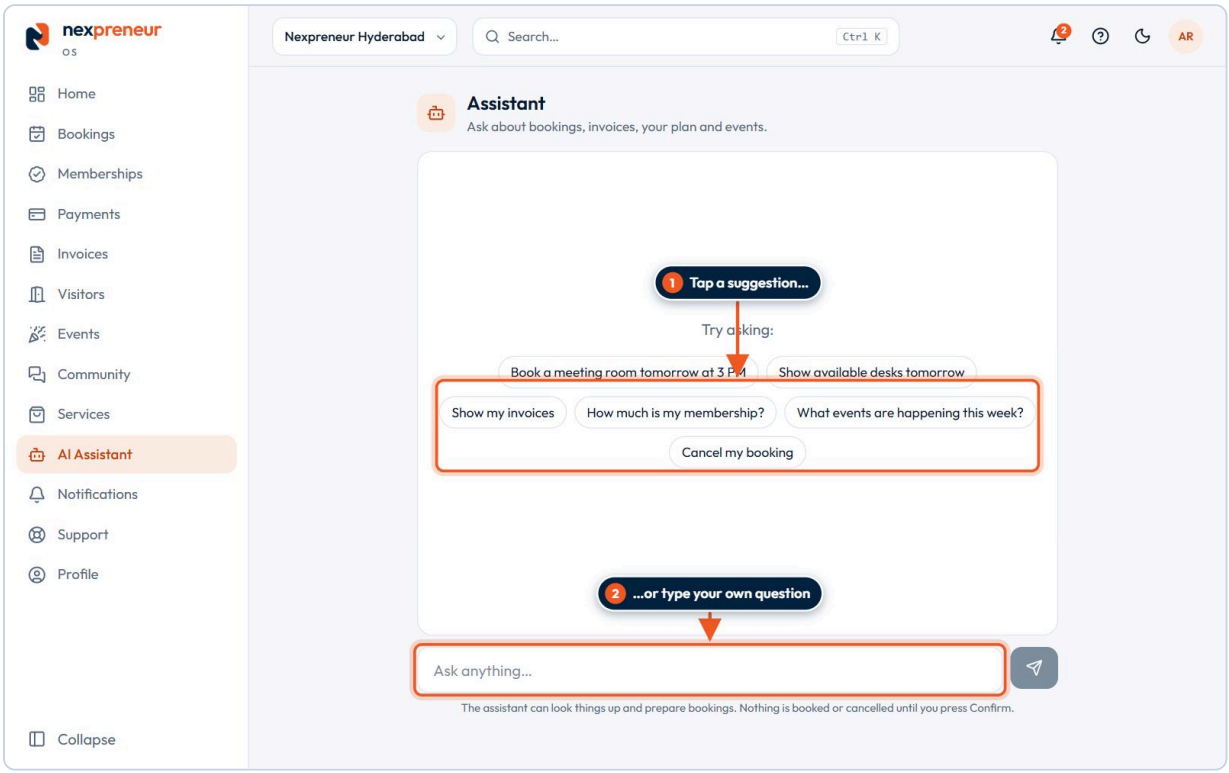

The export contains three blocks: the twelve numbers, the time series (period by period), and the location table. Text that begins with `=`, `+`, `-` or `@` is neutralised so a spreadsheet can never run it as a formula.

CHAPTER 22

The AI Assistant

Ask in everyday words. The assistant looks things up in your real data, and prepares bookings for you to confirm. It never books, cancels or pays anything on its own.

22.1 Opening it

The AI Assistant
1 Tap a suggestion 2 Or type your own question

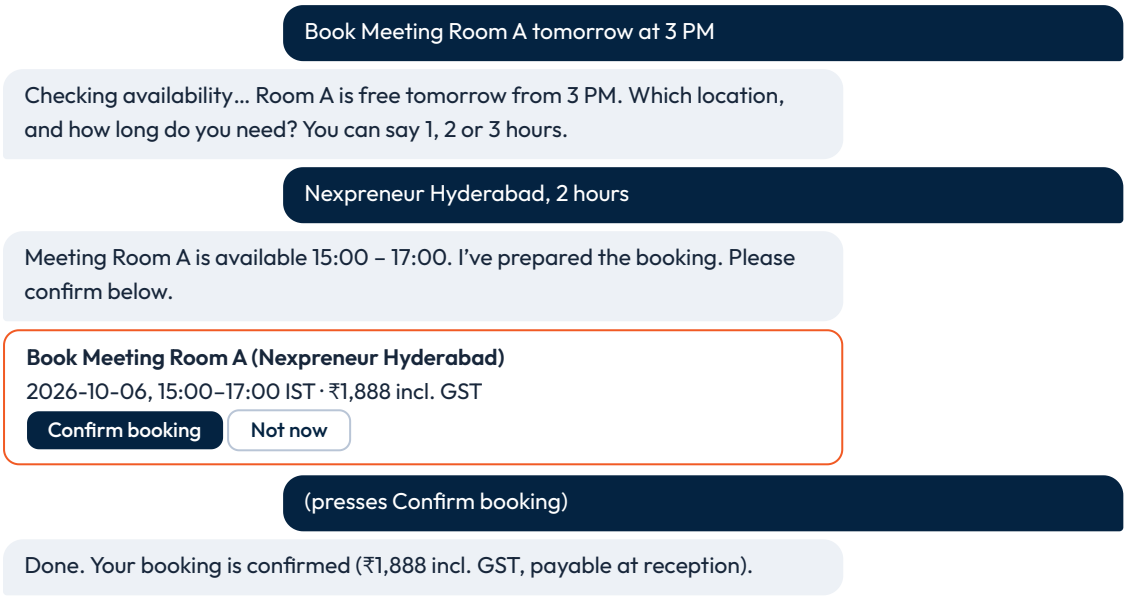

Use **AI Assistant** in the sidebar, or the round button at the bottom right of any page. Members and owners/managers can use it. Tap a suggestion chip or type your own question.

22.2 What it can do

You say	It does
“Show available desks tomorrow”	Checks availability and prices for that day.
“Show my invoices”	Lists your recent invoices with totals and status.
“How much is my membership?”	Tells you your plan, renewal date and all plan prices.
“What events are happening this week?”	Lists upcoming published events, price and spots left.
“Book a meeting room tomorrow at 3 PM”	Asks anything missing, then prepares a booking **for you to confirm**.
“Cancel my booking”	Finds your upcoming bookings and prepares a cancellation **for you to confirm**.

It sees only what **your role** may see: a member's assistant shows that member's own invoices and bookings.

22.3 A booking conversation, step by step

The card's title, time and price are produced by the system from real data, not by the AI's wording.

22.4 Safety built in

- **Nothing happens until you press Confirm.** The confirmation lasts 10 minutes and works only for the person it was made for. Editing it in the browser makes it fail.
- When you confirm, the normal booking checks run again: availability, opening hours and permissions.
- The assistant cannot take payments, change prices or edit anything else. For payment it points you to Invoices.
- Instructions hidden inside data (for example in an event description) are ignored.
- Each person can send up to **30 messages every 10 minutes**.

> **IF IT SAYS IT IS UNAVAILABLE**
> Owners see the real reason. The most common one is **OPENAI_429**: the OpenAI account has no credit. API credit is billed separately from a ChatGPT subscription (chapter 26).

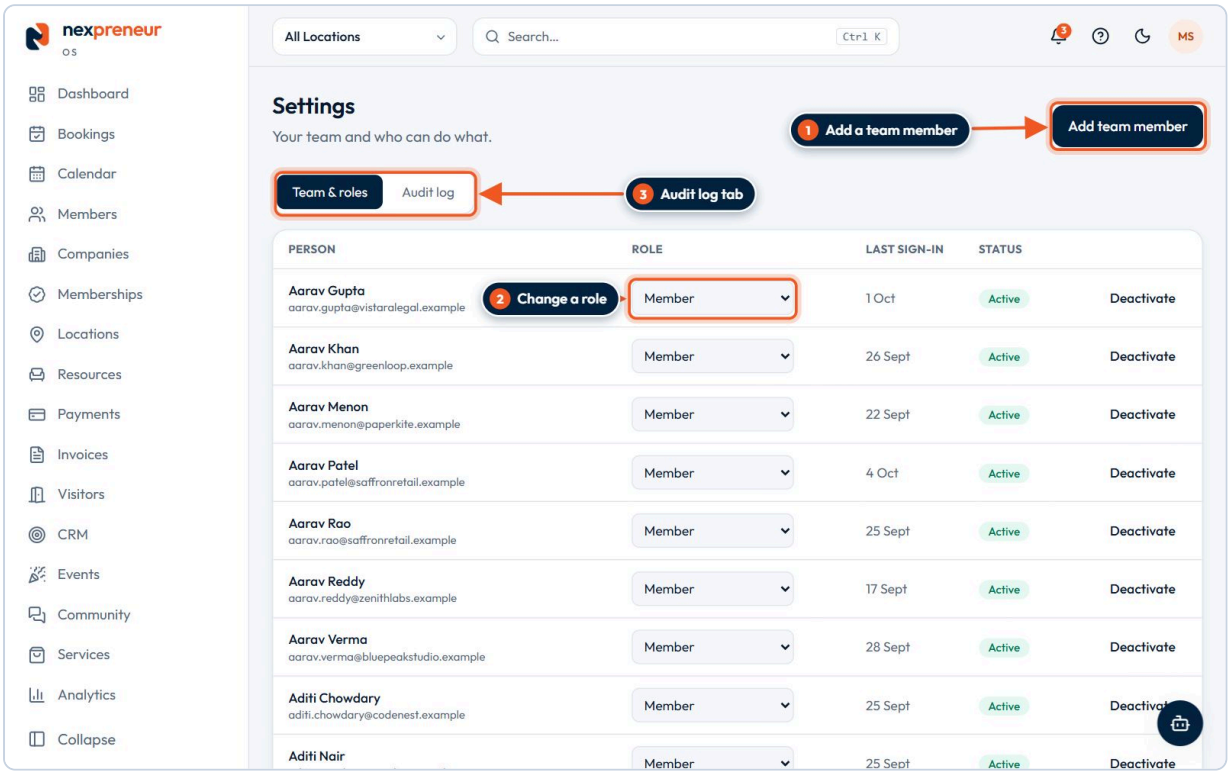

CHAPTER 23

Settings: team, roles and audit log

Settings is for owners. Here you decide who works in the system, what they can do, and you can see a record of what happened.

23.1 Team & roles

Sidebar › Settings › Team & roles

Settings: team and roles

1 Add a team member 2 Change someone's role 3 Audit log tab

A table of everyone in the organisation (members and staff) with role, last sign-in and status.

Adding a team member

1. Press **Add team member**.
2. Enter **name**, **email**, choose a **role** (Reception, Finance, Community Manager, Staff, Location Manager, Owner) and type a **temporary password** (8 to 72 characters).
3. Press **Add member** and share the password privately. The person changes it on their Profile page after signing in.

SAMPLE DATA

Name	Email	Role
Divya Nair	divya@nexpreneur.example	Reception
Ravi Gupta	ravi@nexpreneur.example	Finance
Sneha Iyer	sneha@nexpreneur.example	Community Manager

Divya signs in and lands on **Visitors**; her sidebar shows only Dashboard, Bookings, Calendar, Members, Resources, Visitors, Support, Notifications and Profile.

Changing a role or deactivating

- Use the **role drop-down** on a person's row. A confirmation warns that access changes immediately.
- **Deactivate** blocks sign-in at once; **Reactivate** restores it. Nothing is deleted.

Safety rule	Why
You cannot change your **own** role or deactivate yourself.	Prevents locking yourself out. Ask another owner.
Only a **Super Admin** can grant or change the Super Admin role.	Keeps the top role tightly held.
Changes take effect on the very next page the person opens.	The role is checked against the database every time.

23.2 Audit log

The second tab lists the 60 most recent recorded actions, with who did them and when: sign-ins and sign-ups, bookings created or cancelled, invoices created, payments recorded, refunds, plan price changes, member and role changes, resources and locations changed, announcements sent and more. Use it to answer "who changed this?".

SAMPLE AUDIT ENTRIES

Ravi Gupta	payment.refund:upi	4 Oct, 17:42
Mohammed Sajeed	team.role:member->reception	4 Oct, 11:05
Mohammed Sajeed	plan.update:429900	3 Oct, 18:20
Divya Nair	member.add	3 Oct, 10:12

"429900" is the new Flexi price in paise (₹4,299.00).

CHAPTER 24

The member guide (a one-page tour for members)

Print or share this chapter with your members. It covers everything a member does, in the order they will do it.

24.1 Your first day

1. **Set your password.** Open the welcome email and press *Set my password* (the link lasts 7 days). If you were given a temporary password, sign in and change it under **Profile**.
2. **Sign in** at `os.nexpreneur.com` with your password, an emailed link, or Google.
3. **Complete your profile**: phone, job title, company, emergency contact. Your job title and company are shown in the member directory.

24.2 What you will find

Section	What you do there
Home	See your next booking, your plan and what you owe. Use the quick actions.
Bookings	Book a desk, room, phone booth, office or event space. See and cancel your bookings. (Chapter 10)
Membership	See your plan, price and renewal date.
Payments & Invoices	See every invoice; press *Pay online* or print a PDF. (Chapters 11–12)
Events	Register for events; paid ones give you an invoice. (Chapter 16)
Community	Post, like, comment, find people in the directory. (Chapter 17)
Visitors	Invite a guest and send them the QR code. (Chapter 14)
Services	Order printing, parking, coffee… (Chapter 18)
AI Assistant	Ask it to find or book a space. (Chapter 22)
Support	Ask the team for help. (Chapter 19)
Notifications	See booking confirmations, invoices, reminders and announcements.

24.3 Common tasks in three taps

I want to…	Do this
Book a desk for tomorrow	Home › **Book Desk** › pick tomorrow › **Check availability** › tap a desk › **Confirm booking**.
Pay my invoice	Invoices › open the invoice › **Pay ₹… online**.
Bring a guest on Friday	Visitors › **Generate QR invitation** › send the QR to your guest. Show it at reception.

I want to…	Do this
Get a receipt or tax invoice	Invoices › open it › **Print / Save as PDF**.
Cancel a booking	Bookings › List › **Cancel**.
Report a problem	Support › write the subject and details › **Send request**.

> **TIP**
> On a phone, add the website to your home screen from the browser menu so Nexpreneur OS opens like an app.

CHAPTER 25

Administrator guide: setup and upkeep

For whoever looks after the technical side (often the owner with a little help). It explains how the application is hosted, which settings it needs, and how to switch on email, Google sign-in, online payments, the daily job and the AI Assistant.

25.1 What the system runs on

Part	What it is
Application	A Next.js web application written in TypeScript, kept on GitHub (`Sajeed25/nexpreneur-os`).
Hosting	Hostinger **Deploy Web App** (Node.js 20, Next.js preset, branch `main`). Every push to GitHub redeploys automatically.
Database	Hostinger MySQL/MariaDB, managed with phpMyAdmin.
Email	A Hostinger mailbox over SMTP.
Payments	Razorpay. Sign-in with Google (optional). OpenAI for the assistant (optional).

> **NOTE**
> Hostinger's servers use an older system library, so the application is deliberately built on **Next.js 15**. Do not upgrade to Next.js 16 on this host: the build will fail.

25.2 Deploying from GitHub

1. hPanel › **Websites** › **Add website** › **Deploy Web App** › **Connect with GitHub** and choose the repository.
2. Set: Framework **Next.js**, Branch **main**, Node **20.x**, build `npm run build` , start `npm start` .
3. Open **Environment variables** and add the values in 25.4, then **Deploy**.
4. When the deployment says Completed, open `/api/health` . You should see `{"ok":true,"service":"nexpreneur-os"}` .

25.3 The database

Create it

hPanel › **Databases** › **Management**: create a database, a user and a password. Hostinger adds a prefix, so the real names look like `u123456789_nexpreneurOS` . Use letters and numbers only in the password. Note the database name, user and host (usually `127.0.0.1`).

Connection string

```
mysql://USERNAME:PASSWORD@127.0.0.1:3306/DATABASENAME
```

Type it yourself into the `DATABASE_URL` variable. Never paste it into chat, email or the repository.

Import the tables

In phpMyAdmin, **click your database in the left list first** (the heading must read "Database: …"), open **Import**, and run these files from the repository's `db` folder, in this order:

#	File	Adds
1	`mysql-schema.sql`	Organisations, locations, users, plans, resources, audit log
2	`mysql-0002-bookings.sql`	Bookings
3	`mysql-0003-billing.sql`	Memberships, invoices, invoice lines, payments
4	`mysql-0006-password-reset.sql`	Password reset links, password-change tracking
5	`mysql-catchup.sql`	Everything else: support, visitors, CRM, events, community, notifications, coupons, refunds, companies, services, images, sign-in links, and new columns

> THE MOST IMPORTANT RULE
> **Update the database before deploying code that needs it.** Each release may add columns. If the new code runs against an old database, sign-in fails with `ER_BAD_FIELD_ERROR`. The catch-up file is written to be safe to run again on an existing database, so when in doubt, run it first.

Afterwards the left list should show about 30 tables, including `users`, `locations`, `resources`, `bookings`, `invoices`, `payments`, `events`, `leads` and `notifications`.

25.4 Settings the application reads

Set these under **Environment variables** in hPanel, then **Redeploy** (changes take effect only after a redeploy).

Name	Needed?	What it is / what happens without it
`DATABASE_URL`	Yes	The connection string above. Without a valid `mysql://` value the app runs in demo mode.
`AUTH_SECRET`	Yes	A random string of at least 16 characters (use 32+) that signs sign-in sessions. Too short or missing: sign-in shows "Server setup incomplete". Changing it signs everyone out.
`AUTH_URL`	For email links	Your exact public address with `https://` and no trailing slash, e.g. `https://os.nexpreneur.com`. Used in every emailed link and for Google sign-in.
`SMTP_HOST`, `SMTP_PORT`, `SMTP_USER`, `SMTP_PASS`, `SMTP_FROM`	For email	Mailbox details (25.5). Without them: no emailed links, invoices, invitations or reminders; the matching buttons are disabled.
`GOOGLE_CLIENT_ID`, `GOOGLE_CLIENT_SECRET`	For Google	25.6. Without them the Google button is disabled.
`RAZORPAY_KEY_ID`, `RAZORPAY_KEY_SECRET`, `RAZORPAY_WEBHOOK_SECRET`	For online payment	25.7. Without them "Pay online" is hidden.

Name	Needed?	What it is / what happens without it
`CRON_SECRET`	For the daily job	25.8. A random string of 16+ characters, used as the daily job's password.
`OPENAI_API_KEY`, `OPENAI_MODEL`	For the assistant	25.9. Model defaults to `gpt-4o-mini`.
`SELLER_NAME`, `SELLER_GSTIN`	Recommended	Your business name and GSTIN printed on every invoice. Default name is "Nexpreneur".
`CSP_REPORT_ONLY`	Rarely	Set to `1` only if a security rule blocks a payment window; the rule then logs instead of blocking.

Making a random secret

Open PowerShell (or any terminal with Node installed) and run:

```
node -e "console.log(require('crypto').randomBytes(32).toString('base64url'))"
```

Use a **different** value for `AUTH_SECRET` and for `CRON_SECRET`. Keep them private.

25.5 Email (SMTP)

1. hPanel › **Emails**: create a mailbox such as `noreply@yourdomain.com`.
2. Set `SMTP_HOST=smtp.hostinger.com`, `SMTP_PORT=465`, `SMTP_USER` = the full mailbox address, `SMTP_PASS` = its password, and `SMTP_FROM=Nexpreneur OS <noreply@yourdomain.com>`.
3. Set `AUTH_URL` and redeploy.
4. Test: use **Forgot password?** with your own email. The email should arrive within a minute (check spam the first time).

Email powers: password reset, email sign-in links, welcome invitations, emailed invoices, renewal and reminder emails, and visitor invitations.

25.6 Google sign-in

1. Open **Google Cloud Console** › **APIs & Services** › **Credentials** › **Create credentials** › **OAuth client ID** › **Web application**. (If asked, first set up the OAuth consent screen with your app name.)
2. Under **Authorised redirect URIs** add exactly: `https://os.nexpreneur.com/api/auth/google/callback`
3. Copy the **Client ID** and **Client secret** into `GOOGLE_CLIENT_ID` and `GOOGLE_CLIENT_SECRET`. Redeploy.

The Google button on the sign-in page becomes active. People whose Google email matches an existing account sign in to it; others get a new member account.

25.7 Online payments (Razorpay)

1. In the Razorpay dashboard create **API keys**. Start with **Test mode** keys. Put `RAZORPAY_KEY_ID` and `RAZORPAY_KEY_SECRET` in the settings.

2. Razorpay › **Webhooks** › add `https://os.nexpreneur.com/api/razorpay/webhook`, tick the event **payment.captured**, and choose a webhook secret. Put the same secret in `RAZORPAY_WEBHOOK_SECRET`. Redeploy.
3. Pay a test invoice with Razorpay's test card. Confirm the invoice turns Paid.
4. When happy, swap in **Live** keys and the live webhook.

25.8 The daily job (renewals and reminders)

Hostinger's Node.js apps do not offer a Cron Jobs page, so use a free outside scheduler that calls your address once a day.

1. Create a **CRON_SECRET** (25.4) and add it to the settings. Redeploy.
2. Create a free account at **cron-job.org** and press **Create cronjob**.
3. **URL:** `https://os.nexpreneur.com/api/cron/daily` **Schedule:** every day at 07:00, time zone Asia/Kolkata **Method:** GET.
4. In **Advanced** add a header: name `Authorization`, value `Bearer ` followed by your secret (the word Bearer, a space, then the secret).
5. Press **Test run**. You should get `{"ok":true,…}`.

Test result	Meaning
200 `{"ok":true,…}`	Working.
401 Unauthorized	The header does not match `CRON_SECRET` (check the space after "Bearer").
503 Not configured	`CRON_SECRET` missing, shorter than 16 characters, or the database is not connected. Redeploy after changing settings.
500 `{"ok":false,"error":"ER_…"}`	A database problem. `ER_BAD_FIELD_ERROR` or `ER_NO_SUCH_TABLE` means run the catch-up SQL.

25.9 The AI Assistant (OpenAI)

1. At platform.openai.com create an account, add a payment method and some credit, and create an **API key**.
2. Put it in `OPENAI_API_KEY` (never share it). Optionally set `OPENAI_MODEL`. Redeploy.
3. Under Billing › Limits set a monthly cap so costs can never surprise you.

25.10 Invoice details

Set `SELLER_NAME` (for example "Nexpreneur Technologies Pvt Ltd") and `SELLER_GSTIN` (your 15-character GSTIN). They appear at the top right of every invoice and in invoice emails.

25.11 Updating the application

1. If the release notes mention new database changes, **run the SQL first** (25.3).

2. Push the new code to GitHub. Hostinger redeploys within a few minutes.
3. Check `/api/health`, sign in, and open one page that changed.

25.12 Backups and checks

- Hostinger makes daily backups. **Also export your database** from phpMyAdmin (*Export › Quick › SQL*) before every upgrade and keep the file somewhere safe.
- `/api/health` is a public "is it running" check. When an owner is signed in, `/api/health?deep=1` additionally reports which libraries load and whether the key settings are present (never their values).
- Errors are written to **hPanel › your site › Runtime logs**.

CHAPTER 26

Troubleshooting

Most problems have a short code or message. Find it here first.

What you see	Likely cause	What to do
Sign-in or any page: `ER_BAD_FIELD_ERROR`	The database is missing columns the new code needs.	Run `mysql-catchup.sql` in phpMyAdmin (with the database selected), then reload.
`ER_NO_SUCH_TABLE`	A table was never created.	Run the SQL files in 25.3, ending with the catch-up file.
`ER_ACCESS_DENIED_ERROR`	Wrong database user or password in `DATABASE_URL`.	Re-check the full prefixed username, the password (letters/numbers only), and that the user is linked to the database. Redeploy.
"Server setup incomplete: AUTH_SECRET…"	`AUTH_SECRET` is missing, too short or a placeholder.	Set a random 32+ character value. Redeploy.
"Application error: a server-side exception" with a number	An unexpected failure.	Open Runtime logs near that time and read the first error line. Visit `/api/health?deep=1` as owner.
Email buttons greyed out; no emails arrive	SMTP or `AUTH_URL` not set, or wrong password.	Complete 25.5. Test with Forgot password. Check spam and Runtime logs.
Google: "redirect_uri_mismatch" or "Google sign-in didn't work"	The redirect address in Google Cloud differs from yours.	It must be exactly `https://os.nexpreneur.com/api/auth/google/callback`. Check `AUTH_URL` too.
Razorpay window does not open	Keys missing, or a browser extension blocks it.	Confirm both keys are set and redeployed. Try a private window. If still blocked set `CSP_REPORT_ONLY=1` temporarily.
Invoice stays unpaid after online payment	Webhook not set up or wrong secret.	Check the webhook address and that `RAZORPAY_WEBHOOK_SECRET` matches Razorpay's.
Assistant: `OPENAI_429`	OpenAI account out of credit or rate-limited.	Add credit at platform.openai.com › Billing; wait a minute; retry.
Assistant: `OPENAI_401` / `_404` / `_NETWORK`	Bad key / unknown model / cannot reach OpenAI.	Re-enter the key; set `OPENAI_MODEL=gpt-4o-mini`; check the host's outbound access.
Daily job: 401 / 503 / 500	See 25.8.	Match the header to `CRON_SECRET`; redeploy after changing it; run the catch-up SQL for 500.
"Sorry, that slot was just taken"	Someone booked it a moment earlier.	Pick another time or space. This is the double-booking protection working.
Floor map says "No resources yet"	None created.	Add them under Resources (chapter 6) or press **Add demo resources** (owners).
A menu item or page is missing	Your role does not include it.	Ask an owner to check your role in Settings › Team & roles.
Signed out unexpectedly	Session lasts 8 hours; password changed; account deactivated; `AUTH_SECRET` changed.	Sign in again. If it keeps happening ask an owner to check your account status.

What you see	Likely cause	What to do
Build fails on Hostinger mentioning swc / glibc	Next.js 16 was installed.	Stay on Next.js 15 as in 25.1.

CHAPTER 27

Security and privacy

What protects your data, in plain language, and how to keep it that way.

27.1 What the system does for you

Area	Protection
Passwords	Stored scrambled with bcrypt; nobody, including administrators, can read them. 8 to 72 characters. Sign-in is rate-limited.
Sessions	A signed cookie that scripts cannot read, valid 8 hours. Your role is re-read from the database on every page, so role changes and deactivations apply at once. Changing a password signs out other devices.
Permissions	Enforced on the server for every action, not just by hiding menu items.
Your data only	Every query is limited to your organisation.
Money	Amounts always come from the database; online payments are verified by signature and by asking Razorpay; payments are recorded exactly once; refunds are checked against what was paid.
Double-booking and overbooking	Bookings and event seats are locked while checked.
Email links	One-time, stored only as a fingerprint, expire (15 min, 1 hour or 7 days) and are built from your configured address only.
AI Assistant	Can only propose; you confirm; confirmations are signed, expire in 10 minutes and are tied to you.
Uploads	Only JPEG, PNG and WebP up to 900 KB, checked by content, never SVG.
Web protections	HTTPS enforced, framing blocked, content security policy, and no sniffing of file types.
Audit trail	Important actions are recorded with who and when.

27.2 What you should do

- Give each person their own account and the **lowest role** that lets them do their job.
- **Deactivate** people the day they leave.
- Never share passwords or the secrets in chapter 25. Do not paste them into chat or email.
- Register the owner account immediately after launch and use a strong, unique password.
- Keep database exports somewhere safe and test that you can restore one.
- Sign out on shared computers.

27.3 What is stored about people

Name, email, phone, job title, company and emergency contact (entered by them or by staff); plan, bookings, invoices and payments; visitor names and optional contact details; community posts. The member directory shows only name, role and company. Card details are handled by Razorpay and never stored by Nexpreneur

OS.

KNOWN LIMITS

- Sign-up is open: anyone with the web address can create a **member** account. Staff roles are only granted by an owner.
- The sign-in rate limit is kept in the server's memory, so it resets when the server restarts.
- Door access control, document storage and two-factor sign-in are not built yet.

APPENDIX A

Sample data book

The fictional data used throughout this manual, in one place. Use it to practise: you can type the same records into a test system and compare your screens with the pictures and results in this manual.

A.1 Locations and team

Location	City	Resources
Nexpreneur Hyderabad	Hyderabad	28
Nexpreneur Warangal	Warangal	5

Team member	Role	Email
Mohammed Sajeed	Owner	owner@nexpreneur.example
Divya Nair	Reception	divya@nexpreneur.example
Ravi Gupta	Finance	ravi@nexpreneur.example
Sneha Iyer	Community Manager	sneha@nexpreneur.example

A.2 Resources (Nexpreneur Hyderabad)

Resource	Type	Capacity	Price (before GST)	With 18% GST
Hot Desk H 01 – H 16 (16 desks)	Hot Desk	1	₹300 / day	₹354
Dedicated Desk D 01 – D 06 (6)	Dedicated Desk	1	₹400 / day	₹472
Meeting Room A	Meeting Room	6	₹800 / hour	₹944
Meeting Room B	Meeting Room	8	₹1,000 / hour	₹1,180
Phone Booth 1, Phone Booth 2	Phone Booth	1	₹150 / hour	₹177
Private Office P1	Private Office	6	₹1,500 / day	₹1,770
Event Space	Event Space	60	₹6,000 / hour	₹7,080

Warangal has 4 hot desks at ₹250/day and one meeting room at ₹600/hour.

A.3 Members

#	Member	Company	Plan	Home location	Plan status
1	Aarav Reddy	Zenith Labs	Flexi	Hyderabad	active
2	Ananya Rao	BluePeak Studio	Fixed Desk	Hyderabad	active
3	Imran Khan	Orbit Foods	Private Office	Hyderabad	active

#	Member	Company	Plan	Home location	Plan status
4	Pooja Verma	Pixelwise	Virtual Office	Hyderabad	active
5	Kavya Verma	CodeNest	Flexi	Warangal	active
6	Harsha Nair	GreenLoop	Virtual Office	Warangal	paused
7	Priya Sharma	Zenith Labs	Flexi	Hyderabad	active
8	Rohan Chowdary	Nimbus Cloud	Fixed Desk	Hyderabad	active
9	Fatima Shaik	Lumen Media	Flexi	Warangal	active
10	Naveen Singh	TerraGrid	Fixed Desk	Warangal	active
11	Lakshmi Patel	Vistara Legal	Private Office	Hyderabad	cancelled
12	Vikram Kumar	Anvaya Design	Private Office	Hyderabad	active

A.4 Bookings

Booked by	Space	Date and time	Total (incl. GST)	Status
Aarav Reddy	Meeting Room A	Mon 5 Oct, 10:00–12:00	₹1,888.00	Confirmed
Pooja Verma	Phone Booth 1	Tue 6 Oct, 16:30–17:00	₹88.50	Confirmed
Ananya Rao	Meeting Room B	Thu 8 Oct, 14:00–15:30	₹1,770.00	Confirmed
Rohan Chowdary	Hot Desk H 04	Fri 9 Oct (day)	₹354.00	Confirmed
Imran Khan	Event Space	Sat 10 Oct, 17:00–19:00	₹14,160.00	Cancelled

Phone Booth: ₹150 × 0.5 h = ₹75 + ₹13.50 GST = ₹88.50. Event Space: ₹6,000 × 2 h = ₹12,000 + ₹2,160 GST = ₹14,160.

A.5 Invoices and payments

Invoice	Customer	For	Total	Status and payments
INV-2026-0231	Aarav Reddy	Flexi, 5 Oct – 5 Nov	₹4,718.82	Unpaid (becomes Paid after the payments in chapter 12)
INV-2026-0232	Ananya Rao	Fixed Desk, 5 Oct – 5 Nov	₹5,898.82	Unpaid due 12 Oct
INV-2026-0233	Kavya Verma	Flexi with WELCOME10	₹4,246.94	Paid online (Razorpay)
INV-2026-0234	Imran Khan	Private Office	₹23,598.82	Part paid ₹10,000 bank; balance ₹13,598.82
INV-2026-0235	Aarav Reddy (Zenith Labs Pvt Ltd)	2 × Flexi desks	₹9,437.64	Unpaid
INV-2026-0239	Aarav Reddy	Colour printing × 50 pages	₹590.00	Paid

Check: Private Office ₹19,999 × 18% = ₹3,599.82 → ₹23,598.82.

A.6 Coupons, leads, events, services, visitors

Coupon	Type	Value	Max uses	Valid until
WELCOME10	Percent off	10%	100	31 Dec 2026
FLAT500	Fixed ₹ off	₹500	50	30 Nov 2026

Lead	Interested in	Expected value	Stage
Meera Chowdary	Flexi	₹48,000	New Lead
Kiran Analytics	Fixed Desk	₹60,000	New Lead
Vistara Legal	Private Office	₹2,40,000	Tour Scheduled
Pixelwise	3 desks	₹1,44,000	Proposal Sent
Anvaya Design	Private Office	₹2,40,000	Won

Event	When	Capacity	Ticket
Founders Breakfast	Fri 9 Oct 2026, 09:00–11:00	40	₹500 + GST = ₹590
Pitch Practice Night	Tue 13 Oct 2026, 18:30–20:30	30	Free
GST for Startups workshop	Sat 17 Oct 2026, 11:00–13:00	50	₹300 + GST = ₹354

Service	Price	GST
Colour printing (per page)	₹10.00	18%
Parking (per month)	₹1,500.00	18%
Filter coffee	₹80.00	5%
Mail handling (per month)	₹500.00	18%

APPENDIX B

Calculation cheat sheet

Every number the system produces can be checked by hand. All amounts are kept in paise internally, so there are no rounding surprises.

What	Formula	Example
GST total	(price after discount) × rate ÷ 100, rounded once per invoice	₹3,999 × 18% = ₹719.82
CGST / SGST (same state)	GST ÷ 2 each; any odd paisa goes to SGST	₹359.91 + ₹359.91
IGST (other state)	The full GST	₹719.82
Invoice total	Subtotal − discount + GST	₹3,999 − 0 + 719.82 = ₹4,718.82
Percent coupon	Subtotal × % ÷ 100	10% of ₹3,999 = ₹399.90
Fixed coupon	The amount, never more than the subtotal	₹500 off ₹3,999
Hourly booking	Hours × hourly price; GST added	2 × ₹800 = ₹1,600 → ₹1,888
Daily booking	Daily price once, whatever the hours; GST added	₹300 → ₹354
Renewal date	Start date + billing cycle (1, 3 or 12 months); month ends clamp	31 Jan + 1 month = 28 Feb
Renewal invoice issued	3 days before the renewal date	2 Nov for 5 Nov
First reminder	When due in 2 days or less; then every 3 days; max 5	Due 5 Nov → 3 Nov, 6 Nov…
Invoice balance	Total − paid (refunds reduce “paid”)	₹4,718.82 − ₹2,000 = ₹2,718.82
Refund limit	Payment − already refunded	₹4,718.82 − ₹1,000 = ₹3,718.82 left
MRR	∑ of active plans, per month, before GST	quarterly ₹17,999 → ₹6,000 per month
Occupancy	Booked hours ÷ (resources × 16 h × days)	3,247 ÷ 15,840 = 20.5%
Churn	Ended ÷ (active + ended)	3 ÷ 90 = 3.3%

APPENDIX C

Glossary

Term	Meaning
Active / Paused / Cancelled	States of a membership: renewing, temporarily stopped, ended for good.
Archive	Hide something you no longer use without losing its history (plans, resources, locations).
Audit log	The recorded list of who did what and when.
Billing cycle	How often a plan is invoiced: monthly, quarterly or yearly.
CGST / SGST / IGST	Central, State and Integrated GST. CGST + SGST apply within a state, IGST between states.
Churn	The share of memberships that ended in a period.
Coupon	A code that gives a percentage or fixed rupee discount.
Cron / daily job	A task that runs by itself on a schedule (renewals and reminders).
GSTIN	The 15-character GST registration number of a business.
IST	India Standard Time (UTC+5:30), used for all times.
Location	One physical coworking space of your organisation.
Magic link	A one-time sign-in link sent by email.
Member / Team member	A customer, versus someone who works for you.
Membership	One member on one plan.
MRR / ARR	Monthly / annual recurring revenue.
Occupancy	How much of your bookable time is booked.
Organisation	Your whole business; it holds all locations, people and data.
Paise	One hundredth of a rupee; amounts are stored in paise.
Plan	What you sell: a price, a cycle and benefits.
QR code	The square barcode a visitor shows at reception.
Razorpay	The service that takes online payments.
Resource	A bookable desk, room, office, phone booth or space.
SAC	Services Accounting Code printed on each invoice line.
Session	The period you stay signed in (8 hours).
SMTP	The mail server the system uses to send email.
Void	Cancel an unpaid invoice; it is kept but cannot be paid.
Webhook	A message another service (Razorpay) sends to confirm something happened.

APPENDIX D

Quick reference

D.1 Limits and rules at a glance

Item	Rule
Password length	8 to 72 characters
Session length	8 hours
Failed sign-ins before a pause	8 within 10 minutes
Password reset link / email sign-in link / welcome link	1 hour / 15 minutes / 7 days, each single-use
Booking window	06:00 to 22:00 IST, up to 12 hours, 30-minute steps
Default invoice due date	7 days (event tickets 3 days, renewals 3 days or more)
GST rates available on lines	0, 5, 12, 18, 28%
Coupon code	3 to 40 letters, numbers, - or _
Service order quantity	1 to 50
Image upload	JPEG, PNG or WebP, up to 900 KB (shrunk automatically)
Reminders	At most one every 3 days, 5 in total
AI messages	30 per 10 minutes per person; confirmations last 10 minutes
Lists	Tables show 10 rows per page (resources 15); search filters instantly

D.2 Web addresses

Address	Purpose
`/login`, `/register`, `/forgot-password`	Sign in, sign up, reset password
`/magic-link`	Request an email sign-in link
`/dashboard`, `/bookings`, `/members`, `/invoices` …	The main sections (same names as the sidebar)
`/api/health`	Is the system running? (public)
`/api/health?deep=1`	Detailed checks (owners only)
`/api/cron/daily`	The daily job (needs the secret)
`/api/razorpay/webhook`	Where Razorpay confirms payments
`/api/auth/google/callback`	Where Google returns after sign-in

D.3 Daily routines

Role	A good routine
Reception	Morning: Calendar › Day, Visitors › Today. During the day: check visitors in and out, add new members, answer Support. Evening: close finished requests.
Finance	Morning: Invoices (filter overdue), Payments. Record desk payments, send reminders personally where needed, review the daily job's renewals. Weekly: Analytics export.
Community Manager	Check Events registrations, post an announcement or feed update, reply to comments.
Owner	Dashboard each morning; weekly Analytics and CRM review; monthly: review plans and prices, team roles and the audit log, take a database export.

NEED HELP?

Start with Chapter 26 (Troubleshooting). For anything else, contact your system administrator and tell them the page you were on, what you pressed, and any message or code you saw. A screenshot helps.
